

DIMENSIONAL DC SERVICES

Dimensional Fund Advisors manages over \$10 billion* in defined contribution assets. Our funds are offered by more than six hundred defined contribution plan sponsors.

A SCIENTIFIC APPROACH

Dimensional Fund Advisors offers an array of investment strategies appropriate for the long-term investment horizons of defined contribution plans. We apply the same investment philosophy to the defined contribution market that has made us a leading manager of other institutional assets.

Our scientific approach provides specific benefits for plan sponsors and participants:

- Broad diversification within each fund increases the likelihood of earning market rates of return.
- State-of-the-art portfolio design and smart trading can add value over conventional benchmarks.
- Careful adherence to fund mandates minimizes style drift, making our funds particularly appropriate in forming an asset allocation portfolio.
- Our institutionally priced portfolios carry some of the lowest expense ratios in the industry.

OUR VIEW

Asset allocation and fee transparency are becoming increasingly common in defined contribution plans. We applaud these trends as they are likely to result in more appropriate participant investment decisions. We believe:

- Plan sponsors should offer participants funds that reliably deliver asset class returns and thus can be used as building blocks for asset allocation investing.
- Given the body of evidence suggesting active managers do not outperform the market over time, plan sponsors, as fiduciaries, should provide a menu of low-fee, broadly diversified investment options.
- Plan sponsors should offer investments with low fee structures, since lower fees always benefit participants.

Dimensional supports fee transparency in defined contribution plans. Plan sponsors should work with their providers to understand the fee structure in their plans.

Dimensional Fund Advisors can work with you to design a defined contribution plan investment menu that is consistent with these views.

A FUNDAMENTALLY DIFFERENT APPROACH FOR DEFINED CONTRIBUTION PLANS

Active managers focus on picking individual stocks while index managers strive to replicate arbitrary benchmarks. Dimensional chooses a different path. We structure our strategies based on scientific evidence that documents rewards for taking certain risks. Each Dimensional strategy provides broadly diversified, yet focused exposure to those asset classes that have historically provided higher expected returns.

Whether used to construct an entire menu or to complement other investment options, Dimensional funds can play an important role in defined contribution plan investing.
