DIMENSIONAL FUND ADVISORS

Enhanced US Large Co. Portfolio (I)

As of	December 31, 2011
Symbol	DFELX
CUSIP	233-203-637
Inception Date	7/2/1996

INVESTMENT OBJECTIVE

The investment objective of the Enhanced US Large Company Portfolio is to achieve a total return that exceeds the total return performance of the S&P 500 Index. Generally, the Portfolio will invest in S&P 500 Index stocks, futures, and swaps, in conjunction with high-quality, short-term fixed income obligations. The percentage of assets invested in S&P 500 Index stocks, futures and swaps, and fixed income instruments may vary, but the Portfolio will generally invest at least 80% of its assets directly in securities of the S&P 500.

PRINCIPAL RISKS

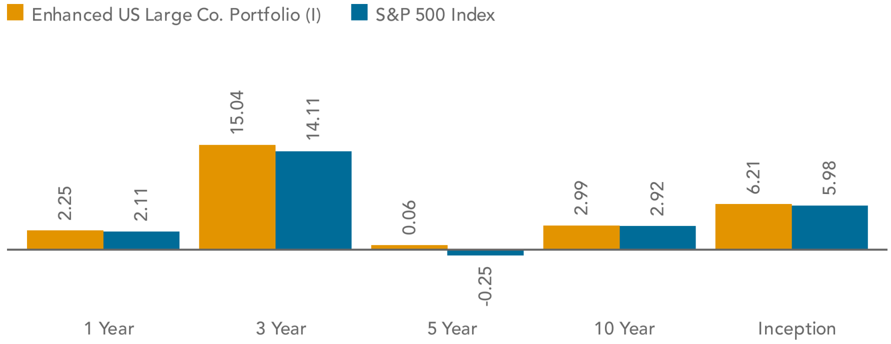
The principal risk associated with this investment is market risk. These risks are described in the Principal Risks section of the prospectus, available at dimensional.com.

FUND COSTS

Management Fee	0.20%
Total Operating Expense Ratio	0.26%
Net Expense Ratio (to investor)	0.26%

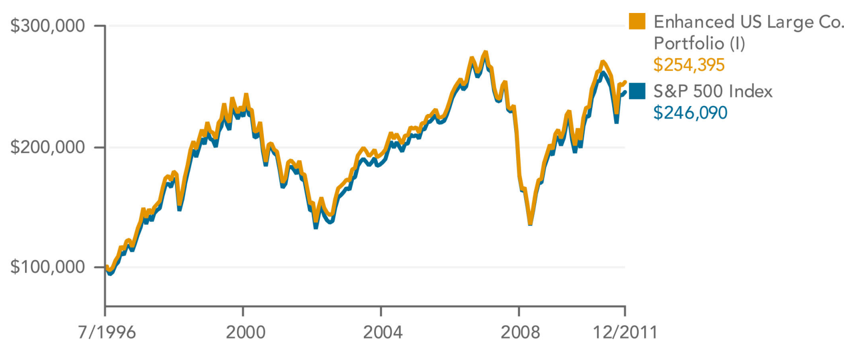
Annual expense ratio as of 10/31/2011. The fund's prospectus contains more complete information on risks, advisory fees, expense reimbursements, and other expenses.

AVERAGE ANNUAL TOTAL RETURNS (%)



Performance data represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance displayed. The investment return and principal value will fluctuate so that an investment's shares, when redeemed, may be worth more or less than their original cost. Visit Dimensional.com for month-end performance information.

GROWTH OF $100,000



BEST/WORST RETURNS

Since Fund Inception	Best	Worst
Three-Month Total Return	27.03% (3/09-5/09)	-29.81% (9/08-11/08)

DIMENSIONAL FUND ADVISORS

Enhanced US Large Co. Portfolio (I)

AS OF DECEMBER 31, 2011

ABOUT DIMENSIONAL

In 1981, Dimensional launched its first strategy based on research documenting the stronger performance of US small cap stocks. Our second strategy, a short-term fixed income portfolio launched in 1983, applies Eugene Fama's term structure research. Later, a comprehensive analysis of prices and other research deepened our strategy repertoire and set a new standard for portfolio design.

PHILOSOPHY

At Dimensional, we see markets as an ally, not an adversary. We believe competition quickly drives stock prices to fair value and that persistent differences in average portfolio returns are explained by differences in average risk. Rather than trying to take advantage of the ways markets are mistaken, we take advantage of the ways markets are right—the ways they compensate investors. Our mission is to deliver the performance of capital markets and increase returns through state-of-the-art portfolio design and trading.

PORTFOLIO CONSTRUCTION

The Enhanced US Large Company Portfolio seeks to provide an annual return in excess of the total return of the S&P 500 by combining S&P 500 stock index futures contracts with a short-term fixed income vehicle. The portfolio relies on Dimensional's ability to deliver a fixed income return that exceeds the short-term interest rate implied in futures contract pricing. This short-term benchmark rate can be approximated by a number of measures such as Treasury bills, LIBOR, or even money fund averages. For three decades, Dimensional has been managing short-term fixed income strategies designed to exceed these benchmarks.
