

INVESTMENT STRATEGY

The US Sustainability Core 1 Portfolio is a no-load mutual fund designed to achieve long-term capital appreciation. The Portfolio seeks to purchase a broad and diverse range of US securities with an increased exposure to small cap stocks and those it considers to be value stocks, relative to the market universe. In assessing value, Dimensional may consider factors such as the issuer's securities having a high book value in relation to their market value, as well as price-to-cash-flow or price-to-earnings ratios. The Portfolio seeks to take into account environmental impact considerations when determining security weights. Relative to a portfolio without such criteria, the Portfolio seeks to exclude or underweight securities of companies that, according to its environmental impact considerations, may have a relatively negative impact on the environment; and it seeks to overweight securities of companies that may have a relatively positive impact on the environment.

PRINCIPAL RISKS

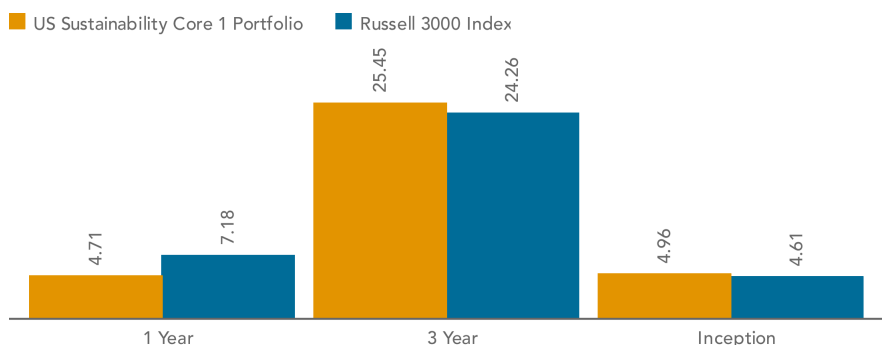

The principal risks associated with this investment are market risk, small company risk and environmental consideration investment risk. Small companies are often less liquid than large companies and thus their value may fluctuate more. These risks are described in the Principal Risks section of the prospectus, available at dimensional.com.

FUND COSTS

Management Fee	0.29%
Total Operating Expense Ratio	0.35%
Net Expense Ratio (to investor)	0.37%

Annual expense ratio as of 10/31/2011. Dimensional has contractually agreed to waive certain fees and assume expenses for a one-year period set to terminate on February 28, 2013 unless renewed. Dimensional may seek reimbursement for amounts previously waived under the conditions outlined in the prospectus. The fund's prospectus contains more complete information on risks, advisory fees, expense reimbursements, and other expenses.

AVERAGE ANNUAL TOTAL RETURNS (%)

Performance data represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance displayed. The investment return and principal value will fluctuate so that an investment's shares, when redeemed, may be worth more or less than their original cost. Visit Dimensional.com for month-end performance information.

GROWTH OF \$100,000

CHARACTERISTICS

	US Sustainability Core 1 Portfolio	Russell 3000 Index	Total Stock Market
Number of Securities	2,254	2,918	3,463
Percentage of Securities in Market	65%	84%	100%
Weighted Average Total Market Cap (millions)	\$72,961	\$91,944	\$92,165
Median Total Market Cap (millions)	\$1,224	\$1,037	\$654
Weighted Average Book-to-Market	0.55	0.49	0.49
Median Book-to-Market	0.56	0.53	0.57
Price/Earnings (excluding negatives)	14.42	14.55	14.49
Annual Turnover (as of 10/31/2011)	14%	-	-

Total Stock Market is defined as the CRSP 1-10 Index, the aggregate market capitalization of all companies listed on the NYSE, AMEX, and NASDAQ exchanges. CRSP data provided by the Center of Research in Securities Prices.

US Sustainability Core 1 Portfolio

ABOUT DIMENSIONAL

In 1981, Dimensional launched its first strategy based on research documenting the stronger performance of US small cap stocks. Our second strategy, a short-term fixed income portfolio launched in 1983, applies Eugene Fama's term structure research. Later, a comprehensive analysis of prices and other research deepened our strategy repertoire and set a new standard for portfolio design.

PHILOSOPHY

At Dimensional, we see markets as an ally, not an adversary. We believe competition quickly drives stock prices to fair value and that persistent differences in average portfolio returns are explained by differences in average risk. Rather than trying to take advantage of the ways markets are mistaken, we take advantage of the ways markets are right—the ways they compensate investors. Our mission is to deliver the performance of capital markets and increase returns through state-of-the-art portfolio design and trading.

PORTFOLIO CONSTRUCTION

Owning a core portfolio reduces reliance on asset class strategies and provides targeted risk factor exposure that may result in lower overall operating expenses and rebalancing costs. A smoother and broader exposure also reduces trading costs and capital gains caused by style drift or the reconstitution of indices and allows Dimensional to emphasize stocks with strong sustainability characteristics without sacrificing industry diversification.

ABOUT SUSTAINABILITY

Starting with the same small cap and value tilts as the US Core Equity 1 Portfolio, the US Sustainability Core 1 Portfolio adds an overlay to tilt toward stocks with high sustainability ratings. Ratings are provided by a third-party vendor that judges companies on climate change, environmental vulnerability, and environmental strength variables. Stocks are scored from best to worst within each industry sector on a quarterly basis.

Using its applied core equity methodology, Dimensional overweights, underweights or eliminates companies based on their sustainability scores. By applying the sustainability overlay on an industry rather than portfolio level, holdings and sector allocations track closely to core equity targets.

The implementation and management of the strategy described above is protected by U.S. Patent Nos. 7,596,525 B1 and 7,599,874 B1.

ASSETS UNDER MANAGEMENT

All Strategies	\$245.1 Billion
Portfolio	\$178.1 Million

INTEGRATED SOLUTION

Smooth, Cost-Effective Exposure to the Market

Asset allocation is traditionally achieved by investing in a core portfolio that replicates the characteristics of the total equity market or by building a portfolio from component asset classes. The US Sustainability Core 1 Portfolio adopts the total market approach by targeting increased exposure to small cap stocks and value stocks across the US equity market.

Strategies Plotted by Size and BtM

US Sustainability Core 1 is market-like in many respects and has a lower tracking error than the S&P 500.
