

## INVESTMENT OBJECTIVE

The US Targeted Value Portfolio is designed to capture the returns and diversification benefits of a broad cross-section of US small and mid cap value companies, on a market-cap weighted basis. The Portfolio generally invests in securities of US companies smaller than the 500th largest company in the market universe. The market universe is comprised primarily of companies listed on the New York Stock Exchange, American Stock Exchange, and Nasdaq Global Market. After identifying the aggregate market capitalization break, a value screen is applied to the universe. Securities are considered value stocks primarily because a company's shares have a high book value in relation to their market value (BtM). This BtM sort excludes firms with negative or zero book values. In assessing value, additional factors such as price-to-cash-flow or price-to-earnings ratios may be considered. The criteria for assessing value are subject to change from time to time.

## PRINCIPAL RISKS

The principal risks associated with this investment are market risk and small company risk. Small companies are often less liquid than large companies, and thus their value may fluctuate more. These risks are described in the Principal Risks section of the prospectus, available at [dimensional.com](http://dimensional.com).

## FUND COSTS

Management Fee	0.35%
Total Operating Expense Ratio	0.38%
Net Expense Ratio (to investor)	0.38%

Annual expense ratio as of 10/31/2011. Dimensional has contractually agreed to waive certain fees and assume expenses for a one-year period set to terminate on February 28, 2013 unless renewed. Dimensional may seek reimbursement for amounts previously waived under the conditions outlined in the prospectus. The fund's prospectus contains more complete information on risks, advisory fees, expense reimbursements, and other expenses.

## AVERAGE ANNUAL TOTAL RETURNS (%)

Performance data represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance displayed. The investment return and principal value will fluctuate so that an investment's shares, when redeemed, may be worth more or less than their original cost. Visit [Dimensional.com](http://Dimensional.com) for month-end performance information.

## GROWTH OF \$100,000

## BEST/WORST RETURNS

Since Fund Inception	Best	Worst
Three-Month Total Return	37.09% (3/09-5/09)	-36.18% (9/08-11/08)
One-Year Total Return	81.56% (3/09-2/10)	-46.53% (3/08-2/09)
Three-Year Annualized Average Return	36.92% (4/03-3/06)	-20.10% (3/06-2/09)
Five-Year Annualized Average Return	21.97% (10/02-9/07)	-6.91% (3/04-2/09)

# US Targeted Value Portfolio (I)

## ABOUT DIMENSIONAL

In 1981, Dimensional launched its first strategy based on research documenting the stronger performance of US small cap stocks. Our second strategy, a short-term fixed income portfolio launched in 1983, applies Eugene Fama's term structure research. Later, a comprehensive analysis of prices and other research deepened our strategy repertoire and set a new standard for portfolio design.

## PHILOSOPHY

At Dimensional, we see markets as an ally, not an adversary. We believe competition quickly drives stock prices to fair value and that persistent differences in average portfolio returns are explained by differences in average risk. Rather than trying to take advantage of the ways markets are mistaken, we take advantage of the ways markets are right—the ways they compensate investors. Our mission is to deliver the performance of capital markets and increase returns through state-of-the-art portfolio design and trading.

## PORTFOLIO CONSTRUCTION

The US Targeted Value Portfolio seeks broadly diversified exposure to small and mid cap companies with value characteristics. The portfolio invests in companies whose market capitalization is lower than the 500th largest company in the total US market universe. After identifying the eligible universe by size, two value screens are then applied. For inclusion in the portfolio, the stocks of the 501st to 1,000th largest companies must have BtM ratios in the upper 25th percentile of the value-weighted universe ranked by BtM. The stocks of companies with lower market capitalizations must have BtM ratios in the upper 50th percentile of the value-weighted universe ranked by BtM. This BtM sort excludes firms with negative or zero book values.

## CHARACTERISTICS

	US Targeted Value Portfolio (I)	Russell 2000 Value Index
Number of Securities	1,525	1,354
Weighted Average Total Market Cap (millions)	\$1,858	\$1,084
