DFA Intermediate-Term Extended Quality Portfolio

INVESTMENT OBJECTIVE

The investment objective of the DFA Intermediate-Term Extended Quality Portfolio (the "Intermediate-Term Extended Quality Portfolio") is to maximize total returns from the universe of debt securities in which the Portfolio invests. Total return is comprised of income and capital appreciation.

FEES AND EXPENSES OF THE PORTFOLIO

This table describes the fees and expenses you may pay if you buy and hold shares of the Intermediate-Term Extended Quality Portfolio.

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses* (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.20%
Other Expenses	0.13%
Total Annual Fund Operating Expenses	0.33%
Fee Waiver and/or Expense Reimbursements or (Recovery)** ..	0.11%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement or (Recovery)	0.22%

* The Intermediate-Term Extended Quality Portfolio is a new portfolio, so the operating expenses shown are based on the anticipated fees and expenses incurred by the Intermediate-Term Extended Quality Portfolio for the fiscal year ended October 31, 2010.

** The Advisor has agreed to waive certain fees and in certain instances, assume certain expenses of the Intermediate-Term Extended Quality Portfolio. The Fee Waiver and Expense Assumption Agreement for the Intermediate-Term Extended-Quality Portfolio will remain in effect through March 1, 2011, and may not be terminated by the Advisor prior to that date.

Example

This Example is meant to help you compare the cost of investing in the Intermediate-Term Extended Quality Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. The costs for the Portfolio reflect the net expenses of the Portfolio that result from the contractual expense waiver and assumption in the first year only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$23	\$95

Because the Portfolio is new, the Example is based on the anticipated expenses for the Portfolio for the current fiscal year, and does not extend over five- and ten-year periods.

Portfolio Turnover

The Intermediate-Term Extended Quality Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, will affect the Intermediate-Term Extended Quality Portfolio’s performance. Because the Portfolio is new, information about its portfolio turnover rate is not yet available.

PRINCIPAL INVESTMENT STRATEGIES

Dimensional Fund Advisors LP (the “Advisor”) believes that fixed income investing should involve a long-term view and a systematic focus on bond market risk and return, not on interest rate forecasting or market timing.

In constructing an investment portfolio, the Advisor identifies a broadly diversified universe of eligible securities with precisely defined maturity ranges and credit quality characteristics. The Advisor will then seek to purchase a broad portfolio of securities that result in the Portfolio maintaining similar characteristics to the whole universe of eligible securities. The Advisor also places priority on efficiently managing portfolio turnover and keeping trading costs low.

The Intermediate-Term Extended Quality Portfolio seeks to maximize total returns from a universe of U.S. and foreign corporate debt securities with an investment grade credit rating. The Intermediate-Term Extended Quality Portfolio invests with an emphasis on a universe of U.S. and foreign corporate debt securities the Advisor considers to be of extended quality as they are rated in the lower half of the investment grade spectrum (i.e., rated BBB- to A+ by Standard & Poor’s Rating Group (“S&P”) or Fitch Ratings Ltd. (“Fitch”) or Baa3 to A1 by Moody’s Investor’s Service, Inc. (“Moody’s”). The Portfolio will not emphasize investments in the lower half of the investment grade spectrum, however, when the Advisor believes the credit risk premium does not warrant the investment. The Portfolio will also invest in higher-rated corporate debt securities, obligations issued or guaranteed by the U.S. and foreign governments, their agencies and instrumentalities, bank obligations, repurchase agreements, obligations of other domestic and foreign issuers having investment grade ratings, securities of domestic or foreign issuers denominated in U.S. dollars but not trading in the United States, and obligations of supranational organizations. At the present time, the Advisor expects that most investments will be made in the obligations of issuers that are located in developed countries, such as those countries which are members of the Organization of Economic Cooperation and Development (“OECD”). However, in the future, the Advisor anticipates investing in issuers located in other countries as well.

The Intermediate-Term Extended Quality Portfolio primarily invests in securities that mature within three to fifteen years from the date of settlement and maintains an average dollar-weighted portfolio duration of between three and ten years. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security’s price to changes in interest rates. The longer a security’s duration, the more sensitive it will be to changes in interest rates. As a non-fundamental policy, under normal circumstances, the Portfolio will invest at least 80% of its net assets in fixed income securities considered to be investment grade quality.

The Intermediate-Term Extended Quality Portfolio’s investments may include foreign securities denominated in foreign currencies. The Portfolio intends to hedge any foreign currency exposure to protect against uncertainty in the level of future foreign currency rates, to hedge against fluctuations in currency exchange rates or to transfer balances from one currency to another. The Portfolio may hedge such currency exposure by entering into foreign forward currency contracts. The Portfolio also may enter into credit default swaps on issuers or indices to buy or sell credit protection to hedge its credit exposure; gain market or issuer

exposure without owning the underlying securities; or increase the Portfolio's total return. The Portfolio also may use derivatives, such as futures contracts and options on futures contracts, for non-hedging purposes as a substitute for direct investment or to allow the Portfolio to remain fully invested while maintaining the liquidity required to pay redemptions.

The Intermediate-Term Extended Quality Portfolio may concentrate its investments in obligations of U.S. and foreign banks and bank holding companies. The Portfolio will concentrate its assets (invest more than 25% of its total assets) in obligations of U.S. and/or foreign banks and bank holding companies ("banking industry securities") when the yield to maturity on eligible portfolio investments in banking industry securities as a group generally exceeds the yield to maturity on all other eligible portfolio investments as a group generally for a period of five consecutive days when the New York Stock Exchange is open for trading. See the section entitled "**Investments in the Banking Industry**" in the Portfolio's prospectus for additional information.

PRINCIPAL RISKS

Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, political, and issuer-specific events will cause the value of securities, and the Intermediate-Term Extended Quality Portfolio, which owns the securities, to rise or fall. Because the value of your investment in the Intermediate-Term Extended Quality Portfolio will fluctuate, there is the risk that you will lose money.

Foreign Securities and Currencies Risk: Foreign securities prices may decline or fluctuate because of: (a) economic or political actions of foreign governments, and/or (b) less regulated or liquid securities markets. Investors holding these securities are also exposed to foreign currency risk (the possibility that foreign currency will fluctuate in value against the U.S. dollar). The Intermediate-Term Extended Quality Portfolio will hedge foreign currency risk.

Interest Rate Risk: Fixed income securities are subject to interest rate risk because the prices of fixed income securities tend to move in the opposite direction of interest rates. When interest rates rise, fixed income securities prices fall. When interest rates fall, fixed income securities prices rise. In general, fixed income securities with longer maturities are more sensitive to these price changes.

Credit Risk: Credit risk is the risk that the issuer of a security may be unable to make interest payments and/or repay principal when due. A downgrade to an issuer's credit rating or a perceived change in an issuer's financial strength may affect a security's value, and thus, impact the Intermediate-Term Extended Quality Portfolio's performance. Credit risk is greater for fixed income securities with ratings below investment grade (BB or below by S&P or Ba or below by Moody's). Fixed income securities that are below investment grade involve high credit risk and are considered speculative. Below investment grade fixed income securities may also fluctuate in value more than higher quality fixed income securities and, during periods of market volatility, may be more difficult to sell at the time and price the Portfolio desires.

Income Risk: Income risk is the risk that falling interest rates will cause the Intermediate-Term Extended Quality Portfolio's income to decline.

Call Risk: Call risk is the risk that during periods of falling interest rates, a bond issuer will call or repay a higher-yielding bond before its maturity date, forcing the Intermediate-Term Extended Quality Portfolio to reinvest in bonds with lower interest rates than the original obligations.

Risks of Banking Concentration: Focus on the banking industry would link the performance of the Intermediate-Term Extended Quality Portfolio to changes in the performance of the banking industry generally. Banks are very sensitive to changes in money market and general economic conditions. The profitability of the banking industry is dependent upon banks being able to obtain funds at reasonable costs and upon liquidity in the capital and credit markets to finance their lending operations. Adverse general economic conditions can cause financial difficulties for a bank's borrowers and the borrowers' failure to repay their loans can adversely affect the bank's financial situation. Banks are subject to extensive regulation and decisions by regulators may limit the loans banks make and the interest rates and fees they charge, which could reduce bank profitability.

Derivatives: Derivatives are securities, such as futures contracts, whose value is derived from that of other securities or indices. Derivatives can be used for hedging (attempting to reduce risk by offsetting one investment position with another) or non-hedging purposes. The use of derivatives for non-hedging purposes may be considered more speculative than other types of investments. When the Intermediate-Term Extended Quality Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative securities are subject to a number of risks including liquidity, interest rate, market, credit and management risks, and the risk of improper valuation. Changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested. Additional risks are associated with the use of credit default swaps including counterparty and credit risk (the risk that the other party to a swap agreement will not fulfill its contractual obligations, whether because of bankruptcy or other default) and liquidity risk (the possible lack of a secondary market for the swap agreement).

PERFORMANCE

Performance information is not available for the Intermediate-Term Extended Quality Portfolio because it has not yet commenced operations. Updated performance information for the Portfolio can be obtained in the future by visiting www.dimensionalfund.com.

INVESTMENT ADVISOR/PORTFOLIO MANAGEMENT

Dimensional Fund Advisors LP serves as the investment advisor for the Intermediate-Term Extended Quality Portfolio. The following portfolio managers are responsible for coordinating the day to day management of the Intermediate-Term Extended Quality Portfolio:

- Stephen A. Clark, Senior Portfolio Manager and Vice President of the Advisor, has been a portfolio manager since 2001.
- David A. Plecha, Senior Portfolio Manager and Vice President of the Advisor, has been a portfolio manager since 1989.

PURCHASE AND REDEMPTION OF FUND SHARES

Investors may purchase or redeem shares of the Portfolio on any business day by first contacting the Advisor at (888) 576-1167 or (512) 306-7400 to notify the Advisor of the proposed investment or redemption. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

TAX INFORMATION

The dividends and distributions you receive from the Intermediate-Term Extended Quality Portfolio are taxable and will generally be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

ADDITIONAL INFORMATION ON INVESTMENT OBJECTIVE AND POLICIES

The investment company described in this Prospectus offers a variety of investment portfolios. Each of the investment company's Portfolios has its own investment objective and policies, and is the equivalent of a separate mutual fund. The Portfolio is designed for long-term investors.

Description of Investments

The following is a description of the categories of investments that may be acquired by the Intermediate-Term Extended Quality Portfolio.

1. *U.S. Government Obligations*—Debt securities issued by the U.S. Treasury which are direct obligations of the U.S. government, including bills, notes and bonds.

2. *U.S. Government Agency Obligations*—Issued or guaranteed by U.S. government-sponsored instrumentalities and federal agencies, which have different levels of credit support. The U.S. government agency obligations include, but are not limited to, securities issued by agencies and instrumentalities of the U.S. government that are supported by the full faith and credit of the United States, such as the Federal Housing Administration and Ginnie Mae, including Ginnie Mae pass-through certificates. Other securities issued by agencies and instrumentalities sponsored by the U.S. government may be supported only by the issuer's right to borrow from the U.S. Treasury, subject to certain limits, such as securities issued by Federal Home Loan Banks, or are supported only by the credit of such agencies, such as Freddie Mac and Fannie Mae.

3. *Corporate Debt Obligations*—Nonconvertible corporate debt securities (e.g., bonds and debentures), which have received an investment grade rating by Moody's, Fitch or S&P or, if unrated, have been determined by the Advisor to be of comparable quality.

4. *Bank Obligations*—Obligations of U.S. banks and savings and loan associations and dollar-denominated obligations of U.S. subsidiaries and branches of foreign banks, such as certificates of deposit (including marketable variable rate certificates of deposit), time deposits and bankers' acceptances. Bank certificates of deposit will only be acquired from banks having assets in excess of \$1,000,000,000.

5. *Repurchase Agreements*—Instruments through which the Portfolio purchases securities ("underlying securities") from a bank or a registered U.S. government securities dealer, with an agreement by the seller to repurchase the securities at an agreed price, plus interest at a specified rate. The underlying securities will be limited to U.S. government and agency obligations described in (1) and (2) above. The Portfolio will not enter into a repurchase agreement with a duration of more than seven days if, as a result, more than 10% of the value of the Portfolio's total assets would be so invested. In addition, a repurchase agreement with a duration of more than seven days will be subject to the Portfolio's illiquid securities policy. The Portfolio also will only invest in repurchase agreements with a bank if the bank has at least \$1,000,000,000 in assets and is approved by the Investment Committee of the Advisor. The Advisor will monitor the market value of the securities plus any accrued interest thereon so that they will at least equal the repurchase price.

6. *Foreign Government and Agency Obligations*—Bills, notes, bonds and other debt securities issued or guaranteed by foreign governments, or their agencies and instrumentalities.

7. *Supranational Organization Obligations*—Debt securities of supranational organizations such as the European Coal and Steel Community, the European Economic Community and the World Bank, which are chartered to promote economic development.

8. *Foreign Issuer Obligations*—Debt securities of non-U.S. issuers that have received a rating of BBB- or better by S&P or Fitch or Baa3 or better by Moody's, or, if unrated, have been determined by the Advisor to be of comparable quality.

9. *Eurodollar Obligations*—Debt securities of domestic or foreign issuers denominated in U.S. dollars but not trading in the United States.

10. *Money Market Funds*—The Portfolio may invest in affiliated and unaffiliated unregistered and registered money market funds. Investments in money market funds may involve a duplication of certain fees and expenses.

The categories of investments that may be acquired by the Portfolio may include both fixed and floating rate securities. Floating rate securities bear interest at rates that vary with prevailing market rates. Interest rate adjustments are made periodically (e.g., every six months), usually based on a money market index such as the London Interbank Offered Rate (LIBOR) or the Treasury bill rate.

Investments in the Banking Industry

The Portfolio will invest more than 25% of its total assets in obligations of U.S. and foreign banks and bank holding companies ("banking industry securities") when the yield to maturity on eligible portfolio investments in banking industry securities as a group generally exceeds the yield to maturity on all other eligible portfolio investments as a group generally for a period of five consecutive days when the New York Stock Exchange ("NYSE") is open for trading. For purposes of this policy, the Advisor considers eligible portfolio investments to be those securities that are on the Advisor's then current buy list that are available for purchase. This policy can only be changed by a vote of shareholders. When investment in such obligations exceeds 25% of the total net assets of the Portfolio the Portfolio will be considered to be concentrating its investments in the banking industry. Once the Portfolio concentrates its investments in the banking industry, the Portfolio may remain concentrated in the banking industry until the purchase of new investments in the normal course of executing the Portfolio's investment strategy results in less than 25% of the Portfolio's total assets consisting of banking industry securities.

The types of bank and bank holding company obligations in which the Portfolio may invest include: dollar-denominated certificates of deposit, bankers' acceptances, commercial paper and other debt obligations issued in the United States provided such obligations meet each Portfolio's established credit rating criteria as stated under "**Description of Investments.**" In addition, the Portfolio is authorized to invest more than 25% of its total assets in Treasury bonds, bills and notes and obligations of federal agencies and instrumentalities. The Portfolio may also invest in non-dollar denominated certificates.

Portfolio Strategy

The Portfolio will be managed with a view to capturing credit risk premiums and term or maturity premiums. The term "credit risk premium" means the anticipated incremental return on investment for holding obligations considered to have greater credit risk than direct obligations of the U.S. Treasury, and "maturity risk premium" means the anticipated incremental return on investment for holding securities having maturities longer than one month compared to securities having a maturity of one month. The Advisor believes that credit risk premiums are available through investment in instruments rated in ranges discussed above. The holding period for assets in the Portfolio will be chosen with a view to maximizing anticipated returns, net of trading costs.

Other Information

Commodity Pool Operator Exemption:

The Portfolio is operated by a person that has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act ("CEA"), and, therefore, such person is not subject to registration or regulation as a pool operator under the CEA.

SECURITIES LOANS

The Portfolio is authorized to lend securities to qualified brokers, dealers, banks, and other financial institutions for the purpose of earning additional income. While the Portfolio may earn additional income from lending securities, such activity is incidental to the Portfolio's investment objective. The value of securities loaned may not exceed 33 1/3% of the value of the Portfolio's total assets, which includes the value of collateral received. To the extent the Portfolio loans a portion of its securities, the Portfolio will receive collateral consisting generally of cash or U.S. government securities, which will be maintained by marking to market daily in an amount equal to at least: (i) 100% of the current market value of the loaned securities, with respect to securities of the U.S. government or its agencies; (ii) 102% of the current market value of the loaned securities, with respect to U.S. securities; and (iii) 105% of the current market value of the loaned securities, with respect to foreign securities. Subject to its stated investment policies, the Portfolio will generally invest the cash collateral received for the loaned securities in The DFA Short Term Investment Fund (the "Money Market Series"), an affiliated registered money market fund advised by the Advisor for which the Advisor receives a management fee of 0.05% of the average daily net assets of the Money Market Series. The Portfolio also may invest the cash collateral received for the loaned securities in securities of the U.S. government or its agencies, repurchase agreements collateralized by securities of the U.S. government or its agencies, and affiliated and unaffiliated registered and unregistered money market funds. For purposes of this paragraph, agencies include both agency debentures and agency mortgage-backed securities.

In addition, the Portfolio will be able to terminate the loan at any time and will receive reasonable interest on the loan, as well as amounts equal to any dividends, interest, or other distributions on the loaned securities. However, dividend income received from loaned securities may not be eligible to be taxed at qualified dividend income rates. See the Statement of Additional Information (the "SAI") for a further discussion of the tax consequences related to securities lending. The Portfolio will be entitled to recall a loaned security to vote proxies or otherwise obtain rights to vote proxies of loaned securities if the Portfolio knows that a material event will occur. In the event of the bankruptcy of the borrower, the Fund could experience delay in recovering the loaned securities or only recover cash or a security of equivalent value.

MANAGEMENT OF THE PORTFOLIO

The Advisor serves as investment advisor to the Portfolio. As such, the Advisor is responsible for the management of the Portfolio's assets. The Portfolio is managed using a team approach. The investment team includes the Investment Committee of the Advisor, portfolio managers and trading personnel.

The Investment Committee is composed primarily of certain officers and directors of the Advisor who are appointed annually. As of the date of this Prospectus, the Investment Committee has seven members. Investment strategies for the Portfolio are set by the Investment Committee, which meets on a regular basis and also as needed to consider investment issues. The Investment Committee also sets and reviews all investment related policies and procedures and approves any changes in regards to approved countries, security types, and brokers.

In accordance with the team approach used to manage the Portfolio, the portfolio managers and portfolio traders implement the policies and procedures established by the Investment Committee. The portfolio managers and portfolio traders also make daily investment decisions regarding the Portfolios including running buy and sell programs, based on the parameters established by the Investment Committee. Stephen A. Clark and David A. Plecha, the portfolio managers for the Portfolio, coordinate the efforts of all other portfolio managers with respect to the day-to-day management of the Portfolio and other fixed income portfolios managed by the Advisor.

Mr. Clark is a Senior Portfolio Manager and Vice President of the Advisor and chairman of the Investment Committee. Mr. Clark received his MBA from the University of Chicago and his BS from Bradley University. Mr. Clark joined the Advisor as a portfolio manager in 2001 and has been responsible for the portfolio management group since January 2006.

Mr. Plecha is a Portfolio Manager and Vice President of the Advisor and a member of the Investment Committee. Mr. Plecha received his BS from the University of Michigan at Ann Arbor in 1983 and his MBA from the University of California at Los Angeles in 1987. Mr. Plecha has been a portfolio manager since 1989 and has been responsible for the fixed income portfolios since the end of 1991.

The Portfolio's SAI provides information about each portfolio manager's compensation, other accounts managed by each portfolio manager, and each portfolio manager's ownership of Portfolio shares.

The Advisor provides the Portfolio with a trading department and selects brokers and dealers to effect securities transactions. Securities transactions are placed with a view to obtaining best price and execution. The Advisor's address is 6300 Bee Cave Road, Building One, Austin, Texas 78746.

DFA Investment Dimensions Group Inc. (the "Fund") bears all of its own costs and expenses, including: services of its independent registered public accounting firm, legal counsel, brokerage commissions, and transfer taxes in connection with the acquisition and disposition of portfolio securities, taxes, insurance premiums, costs incidental to meetings of its shareholders and directors, the cost of filing its registration statements under federal securities laws and the cost of any filings required under state securities laws, reports to shareholders, and transfer and dividend disbursing agency, administrative services, and custodian fees. Expenses allocable to a particular portfolio of the Fund, such as the Portfolio, are so allocated. The expenses of the Fund that are not allocable to a particular portfolio are borne by each portfolio on the basis of its relative net assets.

The Advisor has been engaged in the business of providing investment management services since May 1981. The Advisor is currently organized as a Delaware limited partnership and is controlled and operated by its general partner, Dimensional Holdings Inc., a Delaware corporation. The Advisor controls Dimensional Fund Advisors Ltd. ("DFAL") and DFA Australia Limited ("DFA Australia"). As of January 31, 2010, assets under management for all affiliated advisors totaled approximately \$161 billion.

A discussion regarding the basis for the Board's approving the investment management agreement with respect to the Portfolio will be available in future annual or semi-annual reports to shareholders of the Portfolio.

Management Fees

The "Annual Fund Operating Expenses" table describes the anticipated fees to be incurred by the Portfolio for the services provided by the Advisor for the fiscal year ended October 31, 2010. The "Management Fee" listed in the table for the Portfolio provides the investment advisory fee that is payable by the Portfolio to the Advisor.

Investment Services

Pursuant to a Sub-Advisory Agreement with the Advisor, DFA Australia, Level 43 Gateway, 1 Macquarie Place, Sydney, New South Wales 2000, Australia, has the authority and responsibility to select brokers and dealers to execute securities transactions for the Portfolio. DFA Australia's duties include the maintenance of a trading desk for the Portfolio and the determination of the best and most efficient means of executing securities transactions. On at least a semi-annual basis, the Advisor reviews the Portfolio's holdings and reviews the trading process and the execution of securities transactions. The Advisor is responsible for determining those securities that are eligible for purchase and sale by the Portfolio and may delegate this task, subject to its own review, to DFA Australia. DFA Australia maintains and furnishes to the Advisor information and reports on Japanese and Asia Pacific Rim fixed income securities, including its recommendations of securities to be added to the securities that are eligible for purchase by the Portfolio, as well as making recommendations and elections on corporate actions. The Advisor pays DFA Australia for the services it provides to the Portfolio.

Pursuant to a Sub-Advisory Agreement with the Advisor, DFAL, 7 Down Street, London, W1J7AJ, United Kingdom, a company that is organized under the laws of England, has the authority and responsibility to select

brokers or dealers to execute securities transactions for the Portfolio. DFAL's duties include the maintenance of a trading desk for the Portfolio and the determination of the best and most efficient means of executing securities transactions. On at least a semi-annual basis, the Advisor reviews the Portfolio's holdings and reviews the trading process and the execution of securities transactions. The Advisor is responsible for determining those securities that are eligible for purchase and sale by the Portfolio and may delegate this task, subject to its own review, to DFAL. DFAL maintains and furnishes to the Advisor information and reports on United Kingdom and European fixed income securities, including DFAL's recommendations of securities to be added to the securities that are eligible for purchase by the Portfolio, as well as making recommendations and elections on corporate actions. The Advisor pays DFAL for the services it provides to the Portfolio. DFAL is a member of the Financial Services Authority ("FSA"), a self-regulatory organization for investment managers operating under the laws of England.

Fee Waiver and Expense Assumption Agreement

Pursuant to a Fee Waiver and Expense Assumption Agreement for the Portfolio, the Advisor has agreed to waive all or a portion of its management fee and to assume the ordinary operating expenses of the Portfolio (not including expenses incurred through an investment in other investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses to 0.22% of the Portfolio's average net assets on an annualized basis ("Expense Limitation Amount"). At any time that the annualized Portfolio Expenses of the Portfolio are less than the Portfolio's Expense Limitation Amount, the Advisor retains the right to seek reimbursement for any fees previously waived and/or expenses previously assumed to the extent that such reimbursement will not cause the Portfolio's annualized expenses to exceed the Portfolio's Expense Limitation Amount. The Portfolio is not obligated to reimburse the Advisor for fees previously waived and/or expenses previously assumed by the Advisor more than thirty-six months before the date of such reimbursement. The Fee Waiver Agreement will remain in effect through March 1, 2011, and shall continue in effect from year to year thereafter unless terminated by a Fund or the Advisor.

DIVIDENDS, CAPITAL GAINS DISTRIBUTIONS AND TAXES

Dividends and Distributions. The Portfolio intends to qualify each year as a regulated investment company under the Internal Revenue Code. As a regulated investment company, the Portfolio generally pays no federal income tax on the income and gains it distributes to you. Dividends from net investment income of the Portfolio are distributed each month, except January, and any net realized capital gains (after any reductions for capital loss carryforwards) are distributed annually, typically in December. The Portfolio may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Portfolio.

Capital gains distributions may vary considerably from year to year as a result of a Portfolio's normal investment activities and cash flows. During a time of economic downturn, a Portfolio may experience capital losses and unrealized depreciation in value of investments, the effect of which may be to reduce or eliminate capital gains distributions for a period of time. Even though a Portfolio may experience a current year loss, it may nonetheless distribute prior year capital gains.

You will automatically receive all income dividends and capital gains distributions in additional shares of the Portfolio at net asset value (as of the business date following the dividend record date), unless, upon written notice to the Advisor and completion of account information, you select one of the options listed below:

Income Option—to receive income dividends in cash and capital gains distributions in additional shares at net asset value.

Capital Gains Option—to receive capital gains distributions in cash and income dividends in additional shares at net asset value.

Cash Option—to receive both income dividends and capital gains distributions in cash.

Annual Statements. Every January, you will receive a statement that shows the tax status of distributions you received the previous calendar year. Distributions declared in December to shareholders of record in such month, but paid in January, are taxable as if they were paid in December.

Avoid "Buying A Dividend." At the time you purchase your Portfolio shares, the Portfolio's net asset value may reflect undistributed income, undistributed capital gains, or net unrealized appreciation in value of portfolio securities held by the Portfolio. A subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. This is sometimes referred to as "buying a dividend."

Tax Considerations. This discussion of "Tax Considerations" should be read in conjunction with the remaining subsections below containing additional information. Dividends and distributions paid to a qualified, tax-deferred retirement plan, such as a 401(k) plan, accumulate free of federal income taxes. In addition, the sale or redemption by a tax-deferred retirement plan of the Portfolio's shares will not be subject to federal income taxes.

In general, if you are a taxable investor, Portfolio distributions (other than exempt-interest dividends) are taxable to you as ordinary income, capital gains, or some combination of both. This is true whether you reinvest your distributions in additional Portfolio shares or receive them in cash.

For federal income tax purposes, Portfolio distributions of short-term capital gains are taxable to you as ordinary income. Portfolio distributions of long-term capital gains are taxable to you as long-term capital gains no matter how long you have owned your shares. A Portfolio with a high portfolio turnover rate (a measure of how frequently assets within a Portfolio are bought and sold) is more likely to generate short-term capital gains than a Portfolio with a low portfolio turnover rate. With respect to taxable years of the Portfolio beginning before January 1, 2011, unless such provision is extended or made permanent, a portion of income dividends designated by the Portfolio may be qualified dividend income eligible for taxation by individual shareholders at long-term capital gain rates provided certain holding period requirements are met.

The Portfolio may be subject to foreign withholding taxes on income from foreign securities. If at the end of the fiscal year more than 50% in value of the total assets of the Portfolio is invested in securities of foreign corporations, the Portfolio may elect to pass through to its shareholders their pro rata share of foreign income taxes paid by the Portfolio. If this election is made, shareholders will be required to include in their gross income their pro rata share of these foreign taxes paid by the Portfolio and will be entitled either to deduct (as an itemized deduction in the case of individuals) their share of such foreign taxes in computing their taxable income or to claim a credit for such taxes against their U.S. federal income tax, subject to certain limitations under the Code.

The sale of shares of the Portfolio is a taxable event and may result in a capital gain or loss to you. Capital gain or loss may be realized from an ordinary redemption of shares or an exchange of shares between two Portfolios. Any loss incurred on the sale or exchange of the Portfolio's shares, held for six months or less, will be treated as a long-term capital loss to the extent of capital gain dividends received with respect to such shares.

By law, the Portfolio is required to withhold 28% of taxable dividends, capital gains distributions, and redemption proceeds paid to you if you do not provide your proper taxpayer identification number and certain required certifications. You may avoid this withholding requirement by providing and certifying on the account registration form your correct Taxpayer Identification Number and by certifying that you are not subject to backup withholding and are a U.S. person (including a U.S. resident alien). The Portfolio must also withhold if the IRS instructs it to do so.

In addition to federal taxes, you may be subject to state and local taxes on distributions from the Portfolio and on gains arising on redemption or exchange of the Portfolio's shares. Distributions of interest income and capital gains realized from certain types of U.S. government securities may be exempt from state personal income taxes.

Non-U.S. Investors. Non-U.S. investors may be subject to U.S. withholding tax at a 30% or lower treaty rate and are subject to special U.S. tax certification requirements to avoid backup withholding and claim any treaty

benefits. Exemptions from U.S. withholding tax are provided for capital gain dividends paid by the Portfolio from long-term capital gains, if any, exempt-interest dividends, and, with respect to taxable years of the Portfolio that begin before January 1, 2010 (unless such sunset date is extended, possibly retroactively to January 1, 2010, or made permanent), interest-related dividends paid by the Portfolio from its qualified net interest income from U.S. sources and short-term capital gain dividends. However, notwithstanding such exemptions from U.S. withholding at the source, any such dividends and distributions of income and capital gains will be subject to backup withholding at a rate of 28% if you fail to properly certify that you are not a U.S. person. Non-U.S. investors also may be subject to U.S. estate tax.

This discussion of “Dividends, Capital Gains Distributions and Taxes” is not intended or written to be used as tax advice. Because everyone’s tax situation is unique, you should consult your tax professional about federal, state, local or foreign tax consequences before making an investment in the Portfolio. Prospective investors should also consult the statement of additional information.

PURCHASE OF SHARES

Cash Purchases

Investors may purchase Institutional Class shares of the Portfolio by first contacting the Advisor at (888) 576-1167 or (512) 306-7400 to notify the Advisor of the proposed investment. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions, and a limited number of certain other investors as approved from time to time by the Advisor (“Eligible Investors”). Eligible Investors include employees, former employees, shareholders and directors of the Advisor and the Fund, and friends and family members of such persons. All investments are subject to approval by the Advisor, and all investors must complete and submit the necessary account registration forms in good order. The Fund reserves the right to reject any initial or additional investment and to suspend the offering of shares of the Portfolio.

“Good order” with respect to the purchases of shares means that (1) a fully completed and properly signed Account Registration Form and any additional supporting legal documentation required by the Advisor have been received in legible form, and (2) the Advisor has been notified of the purchase by telephone and, if the Advisor so requests, also in writing, no later than the close of regular trading on the NYSE (normally 1:00 p.m. PST) on the day of the purchase. If an order to purchase shares must be cancelled due to nonpayment, the purchaser will be responsible for any loss incurred by the Fund arising out of such cancellation. To recover any such loss, the Fund reserves the right to redeem shares owned by any purchaser whose order is cancelled, and such purchaser may be prohibited or restricted in the manner of placing further orders.

Investors having an account with a bank that is a member or a correspondent of a member of the Federal Reserve System may purchase shares by first calling the Advisor at (888) 576-1167 or (512) 306-7400 to notify the Advisor of the proposed investment, then requesting the bank to transmit immediately available funds (federal funds) by wire to PNC Bank, N.A. for the account of DFA Investment Dimensions Group Inc. (specify Portfolio). Additional investments also may be made through the wire procedure by first notifying the Advisor. Investors who wish to purchase shares of the Portfolio by check should send their check to DFA Investment Dimensions Group Inc. (specify Portfolio), c/o BNY Mellon Investment Servicing (US) Inc., Attn: Mail Stop F4-F760-1A-J, 760 Moore Road, King of Prussia, PA 19406.

Payment of the total amount due should be made in U.S. dollars. However, subject to approval by the Advisor, payment may be made in any freely convertible currency and the necessary foreign exchange transactions will be arranged on behalf of, and at the expense of, the applicant. Applicants settling in any currency other than U.S. dollars are advised that a delay in processing a purchase or redemption may occur to allow for currency conversion.

Shares also may be purchased and sold by individuals through securities firms that may charge a service fee or commission for such transactions. No such fee or commission is charged on shares that are purchased or

redeemed directly from the Fund. Investors who are clients of investment advisory organizations also may be subject to investment advisory fees under their own arrangements with such organizations.

In-Kind Purchases

If accepted by the Fund, shares of the Portfolio may be purchased in exchange for securities that are eligible for acquisition by the Portfolio or otherwise represented in its portfolio as described in this Prospectus or as otherwise consistent with the Fund's policies and procedures or in exchange for local currencies in which such securities of the Portfolio are denominated. Securities and local currencies accepted by the Fund for exchange and Portfolio shares to be issued in the exchange will be valued as set forth under "VALUATION OF SHARES" at the time of the next determination of net asset value after such acceptance. All dividends, interests, subscription, or other rights pertaining to such securities shall become the property of the Portfolio and must be delivered to the Fund by the investor upon receipt from the issuer. Investors that desire to purchase shares of the Portfolio with local currencies should first contact the Advisor.

The Fund will not accept securities in exchange for shares of the Portfolio unless: (1) such securities are, at the time of the exchange, eligible to be included, or otherwise represented, in the Portfolio and current market quotations are readily available for such securities; (2) the investor represents and agrees that all securities offered to be exchanged are not subject to any restrictions upon their sale by the Portfolio under the Securities Act of 1933 or under the laws of the country in which the principal market for such securities exists, or otherwise; and (3) at the discretion of the Fund, the value of any such security (except U.S. government securities) being exchanged, together with other securities of the same issuer owned by the Portfolio, may not exceed 5% of the net assets of the Portfolio immediately after the transaction. The Fund will accept such securities for investment and not for resale.

A gain or loss for federal income tax purposes will generally be realized by investors who are subject to federal taxation upon the exchange depending upon the cost of the securities or local currency exchanged. Investors interested in such exchanges should contact the Advisor. Purchases of shares will be made in full and fractional shares calculated to three decimal places. In the interest of economy and convenience, certificates for shares will not be issued.

POLICY REGARDING EXCESSIVE OR SHORT-TERM TRADING

The Portfolio is designed for long-term investors and are not intended for investors that engage in excessive short-term trading activity that may be harmful to the Portfolio, including but not limited to market timing. Short-term or excessive trading into and out of the Portfolio can disrupt portfolio management strategies, harm performance, and increase Portfolio expenses for all shareholders, including long-term shareholders who do not generate these costs.

The Board has adopted a policy (the "Trading Policy") and the Advisor and DFA Securities LLC (collectively, "Dimensional") and Dimensional's agents have implemented the following procedures, which are designed to discourage and prevent market timing or excessive short-term trading in the Portfolio: (i) trade activity monitoring and purchase blocking procedures, and (ii) use of fair value pricing.

The Fund, Dimensional, and their agents monitor trades and flows of money into and out of the Portfolio from time to time in an effort to detect excessive short-term trading activities, and for consistent enforcement of the Trading Policy. The Fund reserves the right to take the actions necessary to stop excessive or disruptive trading activities, including refusing or canceling purchase or exchange orders for any reason, without prior notice, particularly purchase or exchange orders that the Fund believes are made on behalf of market timers. The Fund, Dimensional, and their agents reserve the right to restrict, refuse, or cancel any purchase or exchange request made by an investor indefinitely if the Fund or Dimensional believes that any combination of trading activity in the accounts is potentially disruptive to the Portfolio. In making such judgments, the Fund and Dimensional seek to act in a manner that is consistent with the interests of shareholders. For purposes of applying these procedures, Dimensional may consider an investor's trading history in the Portfolio, and accounts under common ownership, influence, or control.

In addition to the Fund's general ability to restrict potentially disruptive trading activity as described above, the Fund also has adopted purchase blocking procedures. Under the Fund's purchase blocking procedures, where an investor has engaged in any two purchases and two redemptions (including redemptions that are part of an exchange transaction) in the Portfolio in any rolling 30 calendar day monitoring period (i.e., two "round-trips"), the Fund and Dimensional intend to block the investor from making any additional purchases in the Portfolio for 90 calendar days (a "purchase block"). If implemented, a purchase block will begin at some point after the transaction that caused the investor to have engaged in the prohibited two round-trips is detected by the Fund, Dimensional, or their agents. The Fund and Dimensional are permitted to implement a longer purchase block, or permanently bar future purchases by an investor, if they determine that it is appropriate.

Under the Fund's purchase blocking procedures, the following purchases and redemptions will not trigger a purchase block: (i) purchases and redemptions of shares having a value in each transaction of less than \$5,000; (ii) non-U.S. investment companies that operate as funds of funds that the Fund or Dimensional, in their sole discretion, have determined are not designed and/or are not serving as vehicles for excessive short-term or other disruptive trading (in each case the fund of funds shall agree to be subject to monitoring by Dimensional); (iii) purchases and redemptions by a feeder portfolio of a master fund's shares; (iv) systematic or automated transactions where the shareholder, financial advisor, or investment fiduciary does not exercise direct control over the investment decision; (v) retirement plan contributions, loans, loan repayments, and distributions (including hardship withdrawals) identified as such in the retirement plan recordkeeper's system; (vi) purchase transactions involving transfers of assets, rollovers, Roth IRA conversions, and IRA recharacterizations; (vii) purchases of shares with Portfolio dividends or capital gain distributions; (viii) transfers and reregistrations of shares within the same Portfolio; and (ix) transactions by 529 Plans. Notwithstanding the Fund's purchase blocking procedures, all transactions in Portfolio shares are subject to the right of the Fund and Dimensional to restrict potentially disruptive trading activity (including purchases and redemptions described above that will not be subject to the purchase blocking procedures).

The Fund, Dimensional, or their designees have the ability, pursuant to Rule 22c-2 under the Investment Company Act of 1940 (the "1940 Act"), to request information from financial intermediaries, such as 401(k) plan administrators, trust companies and broker-dealers (together, "Intermediaries"), concerning trades placed in omnibus and other multi-investor accounts (together, "Omnibus Accounts"), in order to attempt to monitor trades that are placed by the underlying shareholders of these Omnibus Accounts. The Fund, Dimensional, and their designees will use the information obtained from the Intermediaries to monitor trading in the Fund and to attempt to identify shareholders in Omnibus Accounts engaged in trading that is inconsistent with the Trading Policy or otherwise not in the best interests of the Fund. The Fund, Dimensional, or their designees, when they detect trading patterns in shares of the Portfolio (or other portfolios of the Fund) that may constitute short-term or excessive trading, will provide written instructions to the Intermediary to restrict or prohibit further purchases or exchanges of shares of the Portfolio (and other portfolios of the Fund) by a shareholder that has been identified as having engaged in excessive or short-term transactions in the Portfolio's shares (directly or indirectly through the Intermediary's account) that violate the Trading Policy.

The ability of the Fund and Dimensional to impose these limitations, including the purchase blocking procedures, on investors investing through Intermediaries is dependent on the receipt of information necessary to identify transactions by the underlying investors and the Intermediary's cooperation in implementing the Trading Policy. Investors seeking to engage in excessive short-term trading practices may deploy a variety of strategies to avoid detection, and despite the efforts of the Fund and Dimensional to prevent excessive short-term trading, there is no assurance that the Fund, Dimensional or their agents will be able to identify those shareholders or curtail their trading practices. The ability of the Fund, Dimensional and their agents to detect and limit excessive short-term trading also may be restricted by operational systems and technological limitations.

The purchase blocking procedures of the Trading Policy may not apply to redemptions by shareholders whose shares are held on the books of Intermediaries if the Intermediaries have not adopted procedures to implement this Policy. The Fund and Dimensional will work with Intermediaries to develop such policies to

institute the purchase blocking procedures or other procedures that the Fund and Dimensional determine are reasonably designed to achieve the objective of this Trading Policy. At the time the Intermediaries adopt these procedures, shareholders whose accounts are on the books of such Intermediaries will be subject to the Trading Policy's purchase blocking procedures or another frequent trading policy that achieves the objective of the purchase blocking procedures. Investors that invest in the Portfolio through an Intermediary should contact the Intermediary for information concerning the policies and procedures that apply to the investors.

As of the date of this Prospectus, the ability of the Fund and Dimensional to apply the purchase blocking procedures on purchases by all investors, and the ability of the Fund and Dimensional to monitor trades through Omnibus Accounts maintained by Intermediaries, may be restricted due to systems limitations of both the Fund's service providers and the Intermediaries. The Fund expects that the application of the Trading Policy as described above, including the purchase blocking procedures (subject to the limitations described above), will be able to be implemented by Intermediaries in compliance with Rule 22c-2 under the 1940 Act.

In addition, the purchase blocking procedures will not apply to a redemption transaction in which the Portfolio distributes portfolio securities to a shareholder in-kind, where the redemption will not disrupt the efficient portfolio management of the Portfolio and the redemption is consistent with the interests of the remaining shareholders of the Portfolio.

In addition to monitoring trade activity, the Board has adopted fair value pricing procedures that govern the pricing of the securities of the Portfolio. These procedures are designed to help ensure that the prices at which Portfolio shares are purchased and redeemed are fair, and do not result in dilution of shareholder interests or other harm to shareholders. See the discussion under "VALUATION OF SHARES—Net Asset Value" for additional details regarding fair value pricing of the Portfolio's securities.

Although the procedures are designed to discourage excessive short-term trading, none of the procedures individually nor all of the procedures taken together can completely eliminate the possibility that excessive short-term trading activity in the Portfolio may occur. The Portfolio does not knowingly accommodate excessive or disruptive trading activities, including market timing.

VALUATION OF SHARES

Net Asset Value

The net asset value per share of the Portfolio is calculated on days that the NYSE is open for trading. The net asset value per share of the Portfolio is calculated after the close of the NYSE (normally, 1:00 p.m. PT) by dividing the total value of the Portfolio's investments and other assets, less any liabilities, by the total outstanding shares of the stock of the Portfolio. The Portfolio generally calculates its net asset value per share and accepts purchase and redemption orders on days that the NYSE is open for trading. *Note:* The time at which transactions and shares are priced may be changed in case of an emergency or if the NYSE closes at a time other than 1:00 p.m. PT.

The value of shares of the Portfolio will fluctuate in relation to its investment experience. The value of the shares of the Portfolio will tend to fluctuate with interest rates because, unlike money market funds, the Portfolio does not seek to stabilize the value of its shares by use of the "amortized cost" method of asset valuation. Securities held by the Portfolio will be valued in accordance with applicable laws and procedures adopted by the Board, and generally, as described below.

Debt securities will be valued on the basis of prices provided by one or more pricing services or other reasonably reliable sources including broker/dealers that typically handle the purchase and sale of such securities using data reflecting the earlier closing of the principal markets for those securities. Securities which are traded over-the-counter and on a stock exchange generally will be valued according to the broadest and most

representative market, and it is expected that for bonds and other fixed income securities, this ordinarily will be the over-the-counter market. Net asset value includes interest on fixed income securities which is accrued daily. Generally, securities issued by open-end investment companies are valued using their respective net asset values or public offering prices, as appropriate, for purchase orders placed at the close of the NYSE.

The value of the securities and other assets of the Portfolio for which no market quotations are readily available (including restricted securities), or for which market quotations have become unreliable, are determined in good faith at fair value in accordance with procedures adopted by the Board of the Fund. Fair value pricing also may be used if events that have a significant effect on the value of an investment (as determined in the discretion of the Investment Committee of the Advisor) occur before the net asset value is calculated. When fair value pricing is used, the prices of securities used by the Portfolio may differ from the quoted or published prices for the same securities on their primary markets or exchanges.

Valuing securities at fair value involves greater reliance on judgment than valuing securities that have readily available market quotations. There can be no assurance that the Portfolio could obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Portfolio determines its net asset value per share. As a result, the sale or redemption by the Portfolio of its shares at net asset value, at a time when a holding or holdings are valued at fair value, may have the effect of diluting or increasing the economic interest of existing shareholders.

The net asset value per share of the Portfolio is expressed in U.S. dollars by translating the net assets of the Portfolio using the mean of the most recent bid and asked prices for the dollar as quoted by generally recognized reliable sources. Since the Portfolio owns securities that are primarily listed on foreign exchanges which may trade on days when the Portfolio does not price its shares, the net asset values of the Portfolio may change on days when shareholders will not be able to purchase or redeem shares.

Futures contracts are valued using the settlement price established each day on the exchange on which they are traded. The value of such futures contracts held by the Portfolio is determined each day as of such close.

Public Offering Price

Provided that the transfer agent has received the investor's Account Registration Form in good order and the custodian has received the investor's payment, shares of the Portfolio will be priced at the public offering price, which is the net asset value of the shares next determined after receipt of the investor's funds by the custodian. The transfer agent or the Fund may appoint, from time to time, sub-transfer agents or various financial intermediaries ("Intermediaries") for the receipt of purchase orders, redemption orders, and funds from certain investors. Intermediaries, in turn, are authorized to designate other financial intermediaries ("Sub-designees") to receive purchase and redemption orders for the Portfolio's shares from investors. With respect to such investors, the shares of the Portfolio will be priced at the public offering price calculated after receipt of the purchase order by the Intermediary or Sub-designee, as applicable, that is authorized to receive purchase orders. If the investor buys shares through an Intermediary or Sub-designee, the purchase price will be the public offering price next calculated after the Intermediary or Sub-designee, as applicable, receives the order, rather than on the day the custodian receives the investor's payment (provided that the Intermediary or Sub-designee, as applicable, has received the investor's purchase order in good order, and the investor has complied with the Intermediary's or Sub-designee's payment procedures). No reimbursement fee or sales charge is imposed on purchases. If an order to purchase shares must be canceled due to non-payment, the purchaser will be responsible for any loss incurred by the Portfolio arising out of such cancellation. The Fund reserves the right to redeem shares owned by any purchaser whose order is canceled to recover any resulting loss to the Portfolio and may prohibit or restrict the manner in which such purchaser may place further orders.

EXCHANGE OF SHARES

Investors may exchange Institutional Class shares of one Portfolio for Institutional Class shares of another portfolio by first contacting the Advisor at (888) 576-1167 or (512) 306-7400 to notify the Advisor of the proposed exchange and then completing a letter of instruction and sending it to DFA Investment Dimensions Group Inc. Letters of instruction regarding exchange of shares may be mailed to the following address:

DFA Investment Dimensions Group Inc.
Attn: Client Operations
6300 Bee Cave Road, Building One
Austin, TX 78746.

Exchanges are accepted only into those portfolios that are eligible for the exchange privilege.

The minimum amount for an exchange is \$100,000. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary for information regarding exchanges. Shareholders may also contact the Advisor for information regarding the portfolios available for exchanges and to request copies of the prospectuses of such portfolios. There is no fee imposed on an exchange. However, the Fund reserves the right to impose an administrative fee in order to cover the costs incurred in processing an exchange. Any such fee will be disclosed in the Prospectus. An exchange is treated as a redemption and a purchase. Therefore, an investor could realize a taxable gain or loss on the transaction. The Fund reserves the right to revise or terminate the exchange privilege, limit the amount of or reject any exchange, or waive the minimum amount requirement as deemed necessary, at any time.

Investors in any Portfolio eligible for the exchange privilege also may exchange all or part of their Portfolio shares into certain portfolios of Dimensional Investment Group Inc., subject to the minimum purchase requirement set forth in the applicable portfolio's prospectus. Investors may contact the Advisor at the above-listed phone number for more information on such exchanges and to request copies of the prospectuses of portfolios of Dimensional Investment Group Inc.

The exchange privilege is not intended to afford shareholders a way to speculate on short-term movements in the markets. Accordingly, in order to prevent excessive use of the exchange privilege that may potentially disrupt the management of the Portfolio or otherwise adversely affect the Fund, any proposed exchange is subject to the approval of the Advisor. Such approval will depend on: (i) the size of the proposed exchange; (ii) the prior number of exchanges by that shareholder; (iii) the nature of the underlying securities and the cash position of the portfolios involved in the proposed exchange; (iv) the transaction costs involved in processing the exchange; and (v) the total number of redemptions by exchange already made out of the Portfolio. Excessive use of the exchange privilege is defined as any pattern of exchanges among portfolios by an investor that evidences market timing.

The redemption and purchase prices of shares redeemed and purchased by exchange, respectively, are the net asset values next determined after the Advisor has received a letter of instruction in good order. "Good order" means a completed letter of instruction specifying the dollar amount to be exchanged, signed by all registered owners (or representatives thereof) of the shares; and if the Fund does not have on file the authorized signatures for the account, proof of authority. Exchanges will be accepted only if stock certificates have not been issued and the shares of the Portfolio being acquired are registered in the investor's state of residence.

REDEMPTION OF SHARES

Redemption Procedure

Investors who desire to redeem shares of the Portfolio must first contact the Advisor at (888) 576-1167 or (512) 306-7400. Shareholders who invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding redemption procedures. The Portfolio will redeem shares at the net asset value of such shares next determined, after receipt of a written request for redemption in good order, by the transfer agent (or by an Intermediary or a Sub-designee, if applicable). "Good order" means that the request to redeem shares must include all necessary documentation, to be received in writing by the Advisor no later than the close of regular trading on the NYSE (normally 1:00 p.m. PT), including but not limited to: a letter of instruction or a stock assignment specifying the number of shares or dollar amount to be redeemed, signed by all registered owners (or representatives thereof) of the shares; and if the Fund does not have on file the authorized signatures for the account, proof of authority.

Shareholders redeeming shares, who have authorized redemption payment by wire in writing, may request that redemption proceeds be paid in federal funds wired to the bank they have designated in writing. The Fund reserves the right to send redemption proceeds by check in its discretion; a shareholder may request overnight delivery of such check at the shareholder's own expense. If the proceeds are wired to the shareholder's account at a bank that is not a member of the Federal Reserve System, there could be a delay in crediting the funds to the shareholder's bank account. The Fund reserves the right at any time to suspend or terminate the redemption by wire procedure after prior notification to shareholders. No fee is charged for redemptions. The redemption of all shares in an account will result in the account being closed. A new Account Registration Form will be required for future investments. See "**PURCHASE OF SHARES.**" In the interests of economy and convenience, certificates for shares are not issued.

Although the redemption payments will ordinarily be made within seven days after receipt, payment to investors redeeming shares that were purchased by check will not be made until the Fund can verify that the payments for the purchase have been, or will be, collected, which may take up to ten days. Investors may avoid this delay by submitting a certified check along with the purchase order.

Redemption of Small Accounts

With respect to the Portfolio, the Fund reserves the right to redeem an account if the value of the shares in a specific Portfolio is \$500 or less because of redemptions. Before the Fund involuntarily redeems shares from such an account and sends the proceeds to the shareholder, the Fund will give written notice of the redemption to the shareholder at least sixty days before the redemption date. The shareholder will then have sixty days from the date of the notice to make an additional investment in order to bring the value of the shares in the account for a specific Portfolio to more than \$500 and avoid such involuntary redemption. The redemption price to be paid to a shareholder for shares redeemed by the Fund under this right will be the aggregate net asset value of the shares in the account at the close of business on the redemption date. The right to redeem small accounts applies to accounts established with the Fund's transfer agent.

In-Kind Redemptions

When in the best interests of the Portfolio, it may make a redemption payment, in whole or in part, by a distribution of portfolio securities in lieu of cash. Such distributions will be made in accordance with the federal securities laws and regulations governing mutual funds in accordance with Rule 18f-1 under the 1940 Act. The Portfolio also reserves the right to redeem its shares in the currencies in which its investments are denominated. Investors may incur brokerage charges and other transaction costs in selling such securities and converting such currencies to dollars. Also, the value of foreign securities or currencies may be affected by currency exchange fluctuations.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Portfolio generally will disclose up to its 25 largest portfolio holdings (other than cash and cash equivalents) and the percentages that each of these largest portfolio holdings represent of the total assets of the Portfolio, as of the most recent month-end, online at the Advisor's public website, www.dimensional.com, within 20 days after the end of each month. The Portfolio also generally will disclose its complete portfolio holdings (other than cash and cash equivalents), as of month-end, online at the Advisor's public website, two months following the month-end or more frequently and at different periods when authorized in accordance with the Portfolio's policies and procedures. Please consult the SAI for a description of the other policies and procedures that govern disclosure of the portfolio holdings by the Portfolio.

DELIVERY OF SHAREHOLDER DOCUMENTS

To eliminate duplicate mailings and reduce expenses, the Portfolio may deliver a single copy of certain shareholder documents, such as this Prospectus and annual and semi-annual reports, to related shareholders at the same address, even if accounts are registered in different names. This practice is known as "householding." The Portfolio will not household personal information documents, such as account statements. If you do not want the mailings of these documents to be combined with those of other members of your household, please call us collect at (512) 306-7400. We will begin sending individual copies of the shareholder documents to you within 30 days of receiving your request.
