

PROSPECTUS

August 16, 2010

Please carefully read the important information it contains before investing.

DFA INVESTMENT DIMENSIONS GROUP INC.

PORTFOLIO FOR LONG-TERM INVESTORS:

WORLD EX U.S. VALUE PORTFOLIO

INSTITUTIONAL CLASS SHARES

This Prospectus describes shares of the Portfolio which:

Is generally only available to institutional investors and clients of registered investment advisors.

Does not charge a sales commission or load.

The Portfolio described herein is not registered for sale in all states. Potential investors should call Dimensional Fund Advisors at (512) 306-7400 or ask their financial advisors about the availability of the Portfolio in their states. The information contained herein is not an offer to sell or a solicitation of any offer to buy the Portfolio mentioned, and no offers or sales will be made, in any jurisdictions in which the offer or sale of this Portfolio is not qualified or otherwise exempt from regulation.

The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

World ex U.S. Value Portfolio

INVESTMENT OBJECTIVE

The investment objective of the World ex U.S. Value Portfolio is to achieve long-term capital appreciation.

FEES AND EXPENSES OF THE PORTFOLIO

This table describes the fees and expenses you may pay if you buy and hold shares of the World ex U.S. Value Portfolio.

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses* (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.47%
Other Expenses.....	0.18%
Acquired Fund Fees and Expenses**.....	0.26%
Total Annual Fund Operating Expenses.....	0.91%
Fee Waiver (Recovery)***.....	0.31%
Total Annual Fund Operating Expenses After Fee Waiver (Recovery)	0.60%

* The World ex U.S. Value Portfolio is a new portfolio, so the operating expenses shown are based on anticipated fees and expenses for the fiscal year ending October 31, 2010.

** Represents the amount of fees and expenses anticipated to be incurred by the Portfolio through its investments in other funds managed by the Advisor and other investment companies for the fiscal year ending October 31, 2010.

*** Pursuant to a Fee Waiver Agreement for the Portfolio, the Advisor has agreed to waive up to the full amount of the Portfolio's management fee of 0.47% to the extent necessary to offset the proportionate share of the management fees paid by the Portfolio through its investment in other funds managed by the Advisor (the "Underlying Funds"). In addition, under the Fee Waiver Agreement, the Advisor also has agreed to waive all or a portion of the management fee that remains payable by the Portfolio (i.e. the management fee remaining after the proportionate share of the Underlying Funds' management fees have been offset) to the extent necessary to reduce the Portfolio's ordinary operating expenses (including expenses incurred through its investment in other investment companies) ("Portfolio Expenses") so that such Portfolio Expenses do not exceed 0.60% of the Portfolio's average net assets on an annualized basis. The Fee Waiver Agreement for the Portfolio will remain in effect through March 1, 2011, and may not be terminated by the Advisor prior to that date.

Example

This Example is meant to help you compare the cost of investing in the World ex U.S. Value Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. The costs for the Portfolio reflect the net expenses of the Portfolio that result from the contractual expense waiver in the first year only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$61	\$259

Portfolio Turnover

A mutual fund generally pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when mutual fund shares are held in a taxable account. The World ex U.S. Value Portfolio does not pay transaction costs when buying and selling shares of other mutual funds (the "Underlying Funds"); however, the Underlying Funds pay transaction costs when buying and selling securities for their portfolios. The transaction costs incurred by the Underlying Funds, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. Because the Portfolio is new, information about portfolio turnover rate is not yet available.

PRINCIPAL INVESTMENT STRATEGIES

Dimensional Fund Advisors LP (the “Advisor”) believes that equity investing should involve a long-term view and a systematic focus on sources of expected returns, not on stock picking or market timing. In constructing an investment portfolio, the Advisor identifies a broadly diversified universe of eligible securities with precisely-defined risk and return characteristics. It then places priority on efficiently managing portfolio turnover and keeping trading costs low. The Advisor does not intend to purchase or sell securities for the investment portfolio based on prospects for the economy, the securities markets or the individual issuers whose shares are eligible for purchase.

The World ex U.S. Value Portfolio seeks to achieve its investment objective through exposure to a broad portfolio of securities of non-U.S. companies associated with countries with developed and emerging markets, including frontier markets (emerging market countries in an earlier stage of development), that the Advisor believes to be value stocks at the time of purchase. To achieve this exposure, the Advisor will generally purchase shares of The DFA International Value Series (the “DFA International Value Series”), DFA International Small Cap Value Portfolio, and Dimensional Emerging Markets Value Fund (the “Underlying Funds”), which are other funds managed by the Advisor. The Portfolio currently intends to allocate its investments among the Underlying Funds in the following manner: 50% to 80% in the DFA International Value Series; 5% to 20% in the DFA International Small Cap Value Portfolio; and 10% to 30% in the Dimensional Emerging Markets Value Fund. In addition to, or in place of, investments in the Underlying Funds, the Portfolio also is permitted to invest directly in the same types of securities of companies that are described in this Prospectus as eligible investments for the Underlying Funds. The Portfolio and Underlying Funds generally consider securities to be value stocks if they have a high book value in relation to their market value. In assessing market value, the Advisor may consider additional factors such as price to cash flow or price earnings ratios as well as economic conditions and developments in the issuer’s industry. The criteria the Advisor uses for assessing value are subject to change from time to time. The Advisor may consider the relative market capitalization weighting of developed and emerging markets within the universe of eligible securities when allocating Portfolio investments among the Underlying Funds or securities.

Using a market capitalization weighted approach, the DFA International Value Series invests in large value companies associated with developed market countries and the DFA International Small Cap Value Portfolio invests in small value companies associated with developed market countries. Generally, the Advisor determines if a company is large or small based on its market capitalization. A company’s market capitalization is the number of its shares outstanding times its price per share. In general, the higher the relative market capitalization of a company meeting the Advisor’s eligibility thresholds within an eligible country or region, the greater its representation in the Underlying Fund. The Advisor may adjust market capitalization weights after considering such factors as free float, momentum, trading strategies, liquidity management and other factors that the Advisor determines appropriate, given market conditions. The Dimensional Emerging Markets Value Fund may purchase securities of value companies associated with emerging markets, including frontier markets, across all market capitalizations. With respect to each Underlying Fund, the Advisor may limit or fix the Underlying Fund’s exposure to a particular country, region or issuer.

The Portfolio and each Underlying Fund intends to purchase stocks of companies associated with countries that the Advisor has identified as approved markets for investment for such Portfolio or Underlying Fund. As a non-fundamental policy, under normal circumstances, at least 80% of the Portfolio’s net assets will be invested directly, or indirectly through its investment in the Underlying Funds, in securities of non-U.S. companies.

The Portfolio and Underlying Funds may gain exposure to companies associated with approved markets by purchasing equity securities in the form of depository receipts which may be domiciled or traded outside the issuer’s domicile country.

Each Underlying Fund is authorized to use derivatives, such as futures contracts and options on futures contracts for equity securities and indices, to gain market exposure on its uninvested cash pending investment in securities or to maintain liquidity to pay redemptions. The Portfolio and Underlying Funds may lend their portfolio securities to generate additional income.

PRINCIPAL RISKS

Fund of Funds Risk: The investment performance of the World ex U.S. Value Portfolio is affected by the investment performance of the Underlying Funds in which the Portfolio invests. The ability of the Portfolio to achieve its investment objective depends on the ability of the Underlying Funds to meet their investment objectives and on the Advisor’s decisions regarding the allocation of the Portfolio’s assets among Underlying Funds. There can be no assurance that the investment objective of the Portfolio or any Underlying Fund will be achieved. Through its investments in the Underlying Funds, the Portfolio is subject to the risks of the Underlying Funds’ investments. The risks of the Underlying Funds’ investments are described below.

Foreign Securities and Currencies Risk: Foreign securities prices may decline or fluctuate because of: (a) economic or political actions of foreign governments, and/or (b) less regulated or liquid securities markets. Investors holding these securities are also

exposed to foreign currency risk (the possibility that foreign currency will fluctuate in value against the U.S. dollar). The Underlying Funds do not hedge foreign currency risk.

Small Company Risk: Securities of small companies are often less liquid than those of large companies and this could make it difficult to sell a small company security at a desired time or price. As a result, small company stocks may fluctuate relatively more in price. In general, smaller capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Value Investment Risk: Value stocks may perform differently from the market as a whole and following a value-oriented investment strategy may cause the World ex U.S. Value Portfolio and the Underlying Funds to at times underperform equity funds that use other investment strategies.

Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, political, and issuer-specific events will cause the value of securities, and the Underlying Funds that own them, and, in turn, the World ex U.S. Value Portfolio itself, to rise or fall. Because the value of your investment in the Portfolio will fluctuate, there is the risk that you will lose money.

Emerging Markets Risk: Numerous emerging market countries have a history of, and continue to experience serious, and potentially continuing, economic and political problems. Stock markets in many emerging market countries are relatively small, expensive to trade in and risky. Foreigners are often limited in their ability to invest in, and withdraw assets from, these markets. Additional restrictions may be imposed under other conditions. Frontier market countries generally have smaller economies or less developed capital markets and, as a result, the risks of investing in emerging market countries are magnified in frontier market countries.

Derivatives: Derivatives are securities, such as futures contracts, whose value is derived from that of other securities or indices. The use of derivatives for non-hedging purposes may be considered more speculative than other types of investments. When the Underlying Funds use derivatives, the World ex U.S. Value Portfolio will be exposed to the risks of that derivative. Derivative securities are subject to a number of risks including liquidity, interest rate, market, credit and management risks, and the risk of improper valuation. Changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, and the Underlying Fund could lose more than the principal amount invested.

Securities Lending: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, an Underlying Fund may lose money and there may be a delay in recovering the loaned securities. An Underlying Fund could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain potential adverse tax consequences. To the extent that the Portfolio holds securities directly and lends those securities, it will be also subject to the foregoing risks with respect to its loaned securities.

PERFORMANCE

Performance information is not available for the World ex U.S. Value Portfolio because it has not yet commenced operations. Updated performance information for the Portfolio can be obtained in the future by visiting www.dimensionalfund.com.

INVESTMENT ADVISOR/PORTFOLIO MANAGEMENT

Dimensional Fund Advisors LP serves as the investment advisor for the World ex U.S. Value Portfolio and the Underlying Funds. The following portfolio managers are responsible for coordinating the day to day management of the Portfolio and Underlying Funds:

- Karen E. Umland, Senior Portfolio Manager and Vice President of the Advisor, has been a portfolio manager since 1998.
- Stephen A. Clark, Senior Portfolio Manager and Vice President of the Advisor, has been a portfolio manager since 2001.
- Joseph H. Chi, Portfolio Manager and Vice President of the Advisor, has been a portfolio manager since 2005.
- Jed S. Fogdall, Portfolio Manager and Vice President of the Advisor, has been a portfolio manager since 2004.

PURCHASE AND REDEMPTION OF FUND SHARES

Investors may purchase or redeem shares of the World ex U.S. Value Portfolio on any business day by first contacting the Advisor at (888) 576-1167 or (512) 306-7400 to notify the Advisor of the proposed investment or redemption. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors,

clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

TAX INFORMATION

The dividends and distributions you receive from the World ex U.S. Value Portfolio are taxable and will generally be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

ADDITIONAL INFORMATION ON INVESTMENT OBJECTIVE AND POLICIES

The investment company described in this Prospectus offers a variety of investment portfolios. Each of the investment company's portfolios has its own investment objective and policies, and is the equivalent of a separate mutual fund. The World ex U.S. Value Portfolio described in this Prospectus is designed for long-term investors.

The investment objective of the World ex U.S. Value Portfolio is to achieve long-term capital appreciation. The Portfolio is a "fund of funds," which means that the Portfolio generally allocates its assets among other mutual funds managed by the Advisor though it also has the ability to invest directly in securities. The Portfolio seeks to achieve exposure to a broad portfolio of securities of non-U.S. companies associated with countries with developed and emerging markets, including frontier markets (emerging markets in an earlier stage of development), that the Advisor believes to be value stocks at the time of purchase by primarily purchasing shares of The DFA International Value Series (the "DFA International Value Series"), DFA International Small Cap Value Portfolio, and Dimensional Emerging Markets Value Fund (the "Underlying Funds"). Securities are considered value stocks primarily because a company's shares have a high book value in relation to their market value (a "book to market ratio"). In assessing value, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios, as well as economic conditions and developments in the issuer's industry. The criteria the Advisor uses for assessing value are subject to change from time to time.

The Portfolio typically allocates its investments among the Underlying Funds in the following manner: 50% to 80% in the DFA International Value Series; 5% to 20% in the DFA International Small Cap Value Portfolio; and 10% to 30% in the Dimensional Emerging Markets Value Fund. The DFA International Value Series and DFA International Small Cap Value Portfolio invest in the securities of eligible companies using a market capitalization weighted approach to determine security weights and country weights. A company's market capitalization is the number of its shares outstanding times its price per share. In general, the higher the relative market capitalization of a company within an eligible country, the greater its representation in the Underlying Fund. The Advisor may consider the relative market capitalization weighting of developed and emerging markets within the universe of eligible securities when allocating Portfolio investments among the Underlying Funds or securities.

The investment objective of each Underlying Fund is to achieve long-term capital appreciation. The DFA International Value Series, using a market capitalization weighted approach, purchases value stocks of large non-U.S. companies in countries with developed markets that the Advisor has designated as Approved Markets for the Series. The DFA International Small Cap Value Portfolio, using a market capitalization weighted approach, purchases value stocks of small non-U.S. companies in countries with developed markets that the Advisor has designated as Approved Markets for the Portfolio. The Dimensional Emerging Markets Value Fund purchases emerging market equity securities that are deemed by the Advisor to be value stocks at the time of purchase and associated with emerging markets, including frontier markets (emerging market countries in an earlier stage of development), that the Advisor has designated as Approved Markets for the Fund. As of the date of this Prospectus, the DFA International Value Series and DFA International Small Cap Value Portfolio may invest in the stocks of companies associated with the following countries designated by the Advisor as Approved Markets: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Israel, Hong Kong, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom. With respect to the Dimensional Emerging Markets Value Fund, as of the date of this Prospectus, the Fund may invest in the following emerging markets countries that are designated by the Advisor as Approved Markets: Brazil, Chile, China, Czech Republic, Hungary, India, Indonesia, Malaysia, Mexico, the Philippines, Poland, Russia, South Africa, South Korea, Taiwan, Thailand and Turkey. The Advisor will determine in its discretion when and whether to invest in markets that have been authorized as Approved Markets for each Underlying Fund, depending on a number of factors, such as asset growth in the Underlying Fund and characteristics of each such market. The Investment Committee of the Advisor also may authorize other markets for investment in the future, in addition to the Approved Markets identified above, or may remove one or more markets from the list of Approved Markets for an Underlying Fund. Also, an Underlying Fund may continue to hold investments in countries that are not currently designated as Approved Markets, but had been authorized for investment in the past, and may reinvest distributions received in connection with such existing investments in such previously Approved Markets. For a description of the securities approved for investment, see **"Approved Markets."**

With respect to the DFA International Value Series and DFA International Small Cap Value Portfolio, in the countries or regions authorized for investment, the Advisor first ranks eligible companies listed on selected exchanges based on the companies' market capitalization. The Advisor then determines the universe of eligible stocks by defining the minimum market capitalization of a large company that may be purchased by the DFA International Value Series with respect to each country or region and the maximum market capitalization of a small company that may be purchased by the DFA International Small Cap Value Portfolio with respect to each country or region. As of December 31, 2009, the lowest minimum market capitalization of a large company in any country or region in which the DFA International Value Series invests was \$1,405 million, and the highest maximum market capitalization of a small company in any country in which the DFA International Small Cap Value Portfolio invests was \$3,769 million. These thresholds will vary by country or region. For example, as of December 31, 2009, the Advisor considered a large company in the European Monetary Union (EMU) to have a market capitalization of at least \$3,769 million, a large company in Australia to have a

market capitalization of at least \$2,010 million and a large company in Japan to have a market capitalization of at least \$1,405 million. In contrast, the Advisor considered a small company in the United Kingdom to have a market capitalization below \$3,330 million, a small company in Hong Kong to have a market capitalization below \$2,000 million, and a small company in Japan to have a market capitalization below \$1,405 million. These dollar amounts will change due to market conditions. The DFA International Value Series and DFA International Small Cap Value Portfolio each intend to purchase securities in each applicable country using a market capitalization approach. The Advisor, using this approach and its judgment, will seek to set country weights based on the relative market capitalization of eligible companies within each country. See “**Market Capitalization Approach.**” As a result, the weightings of certain countries in the DFA International Value Series and DFA International Small Cap Value Portfolio may vary from their weightings in international indices, such as those published by FTSE International, Morgan Stanley Capital International or Citigroup.

In determining what emerging market countries are eligible markets for the Dimensional Emerging Markets Value Fund, the Advisor may consider various factors, including without limitation, the data, analysis, and classification of countries published or disseminated by the International Bank for Reconstruction and Development (commonly known as the World Bank), the International Finance Corporation, FTSE International, Morgan Stanley Capital International, Citigroup and the Heritage Foundation. Approved emerging markets may not include all such emerging markets. In determining whether to approve markets for investment, the Advisor will take into account, among other things, market liquidity, relative availability of investor information, government regulation, including fiscal and foreign exchange repatriation rules and the availability of other access to these markets for the Dimensional Emerging Markets Value Fund. Pending the investment of new capital in Approved Markets securities, the Dimensional Emerging Markets Value Fund will typically invest in money market instruments or other highly liquid debt instruments including those denominated in U.S. dollars (including, without limitation, repurchase agreements). In addition, the Dimensional Emerging Markets Value Fund, may, for liquidity, or for temporary defensive purposes during periods in which market or economic or political conditions warrant, purchase highly liquid debt instruments or hold freely convertible currencies, although the Fund does not expect the aggregate of all such amounts to exceed 10% of its net assets under normal circumstances.

In addition to, or in place of, investments in the Underlying Funds, the World ex U.S. Value Portfolio also is permitted to invest directly in the same types of securities of companies that are described in this Prospectus as eligible investments for the Underlying Funds.

The value criteria used by the Advisor, as described above, generally apply at the time of purchase by the Portfolio or an Underlying Fund. The Portfolio and Underlying Funds are not required to dispose of a security if the security’s issuer does not meet current value criteria. Similarly, the Advisor is not required to sell a security even if the decline in the market capitalization reflects a serious financial difficulty or potential or actual insolvency of the company. Securities which do meet the value criteria nevertheless may be sold at any time when, in the Advisor’s judgment, circumstances warrant their sale. See “**Portfolio Transactions.**”

Each Underlying Fund may enter into futures contracts and options on futures contracts for equity securities and indices. The World ex U.S. Value Portfolio and each Underlying Fund may invest in exchange-traded funds (ETFs) and similarly structured pooled investments for the purposes of gaining exposure to the equity markets, while maintaining liquidity. In addition to money market instruments and other short-term investments, the Portfolio and each Underlying Fund may invest in affiliated and unaffiliated registered and unregistered money market funds. The Portfolio and Underlying Funds may invest in such money market funds and other short-term investments to manage cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in money market funds may involve a duplication of certain fees and expenses.

Approved Markets

The Underlying Funds and the Portfolio invest in securities of Approved Markets (as identified above) listed on bona fide securities exchanges or traded on the over-the-counter markets. These exchanges or over-the-counter markets may be either within or outside the issuer’s domicile country. For example, the securities may be listed or traded in the form of European Depositary Receipts, Global Depositary Receipts, American Depositary Receipts, or other types of depositary receipts (including nonvoting depositary receipts) or may be listed on bona fide securities exchanges in more than one country. An Underlying Fund or the Portfolio will consider for purchase securities that are associated with an Approved Market, and include, among others: (a) securities of companies that are organized under the laws of, or maintain their principal place of business in, an Approved Market; (b) securities for which the principal trading market is in an Approved Market; (c) securities issued or guaranteed by the government of an Approved Market, its agencies or instrumentalities, or the central bank of such country or territory; (d) securities denominated in an Approved Market currency issued by companies to finance operations in Approved Markets; (e) securities of companies that derive at least 50% of their revenues or profits from goods produced or sold, investments made, or services performed in Approved Markets or have at least 50% of their assets in Approved Markets; (f) equity securities of companies in Approved Markets in the form of depositary shares; (g) securities of pooled investment vehicles that invest primarily in securities of Approved Markets or derivative instruments that derive their value from securities of Approved Markets; or (h) securities included in the Portfolio’s benchmark index. Securities of

Approved Markets may include securities of companies that have characteristics and business relationships common to companies in other countries or regions. As a result, the value of the securities of such companies may reflect economic and market forces in such other countries or regions as well as in the Approved Markets. The Advisor, however, will select only those companies that, in its view, have sufficiently strong exposure to economic and market forces in Approved Markets. For example, the Advisor may invest in companies organized and located in the United States or other countries or regions outside of Approved Markets, including companies having their entire production facilities outside of Approved Markets, when such companies meet the criteria discussed above to be considered associated with Approved Markets.

Market Capitalization Weighted Approach

The portfolio structures of the DFA International Value Series and DFA International Small Cap Value Portfolio, involve market capitalization weighting in determining individual security weights and country or region weights. Market capitalization weighting means each security is generally purchased based on the issuer's relative market capitalization. Market capitalization weighting will be adjusted by the Advisor for a variety of factors. The Advisor may consider such factors as free float, momentum, trading strategies, liquidity management and other factors determined to be appropriate by the Advisor given market conditions. The Advisor may deviate from market capitalization weighting to limit or fix the exposure of an Underlying Fund to a particular issuer to a maximum proportion of the assets of the Underlying Fund. The Advisor may exclude the stock of a company that meets applicable market capitalization criterion if the Advisor determines, in its judgment, that the purchase of such stock is inappropriate in light of other conditions. These adjustments will result in a deviation from traditional market capitalization weighting.

Adjustment for free float adjusts market capitalization weighting to exclude the share capital of a company that is not freely available for trading in the public equity markets by international investors. For example, the following types of shares may be excluded: (i) those held by strategic investors (such as governments, controlling shareholders and management), (ii) treasury shares, or (iii) shares subject to foreign ownership restrictions.

Deviation from market capitalization weighting also will occur because the Advisor generally intends to purchase in round lots. Furthermore, the Advisor may reduce the relative amount of any security held in order to retain sufficient portfolio liquidity. A portion, but generally not in excess of 20% of assets, may be invested in interest bearing obligations, such as money market instruments, thereby causing further deviation from market capitalization weighting. A further deviation may occur due to investments in privately placed convertible debentures.

Block purchases of eligible securities may be made at opportune prices, even though such purchases exceed the number of shares that, at the time of purchase, adherence to a market capitalization weighted approach would otherwise require. In addition, securities eligible for purchase or otherwise represented in an Underlying Fund may be acquired in exchange for the issuance of shares. See **"PURCHASE OF SHARES—In Kind Purchases."** While such transactions might cause a deviation from market capitalization weighting, they would ordinarily be made in anticipation of further growth of assets.

Changes in the composition and relative ranking (in terms of market capitalization) of the stocks that are eligible for purchase take place with every trade when the securities markets are open for trading due, primarily, to price fluctuations of such securities. On at least a semi-annual basis, the Advisor will identify companies whose stock is eligible for investment by an Underlying Fund. Additional investments generally will not be made in securities that have changed in value sufficiently to be excluded from the Advisor's then current market capitalization requirement for eligible portfolio securities. This may result in further deviation from market capitalization weighting. Such deviation could be substantial if a significant amount of holdings of an Underlying Fund change in value sufficiently to be excluded from the requirement for eligible securities, but not by a sufficient amount to warrant their sale.

Country weights may be based on the total market capitalization of companies within each country. The calculation of country market capitalization may take into consideration the free float of companies within a country or whether these companies are eligible to be purchased for the particular strategy. In addition, to maintain a satisfactory level of diversification, the Investment Committee may limit or fix the exposure to a particular country or region to a maximum proportion of the assets of that vehicle. Country weights may also deviate from target weights due to general day-to-day trading patterns and price movements. As a result, the weighting of certain countries may vary from their weighting in published international indices.

Portfolio Transactions

Securities will not be purchased or sold based on the prospects for the economy, the securities markets or the individual issuers whose shares are eligible for purchase. Securities which have depreciated in value since their acquisition will not be sold solely because prospects for the issuer are not considered attractive or due to an expected or realized decline in securities prices in general. Securities will not be sold to realize short-term profits, but when circumstances warrant, they may be sold without regard to the length of time held. Securities, including those eligible for purchase, may be disposed of, however, at any time when, in the Advisor's

judgment, circumstances warrant their sale, including but not limited to tender offers, mergers and similar transactions, or bids made for block purchases at opportune prices. Generally, securities will be purchased with the expectation that they will be held for longer than one year and will be held until such time as they are no longer considered an appropriate holding in light of the investment policy of the Portfolio and Underlying Funds.

Other Information

Commodity Pool Operator Exemption

The Portfolio and Underlying Funds are operated by a person that has claimed an exclusion from the definition of the term “commodity pool operator” under the Commodity Exchange Act (“CEA”), and, therefore, such person is not subject to registration or regulation as a pool operator under the CEA.

Fund of Funds Portfolio Turnover

Because the World ex U.S. Value Portfolio is new, information about its portfolio turnover rate is not yet available. Future disclosure of the portfolio turnover rate provided for the Portfolio under the heading “**Portfolio Turnover**” will be unaudited. The portfolio turnover rate will be derived from the portfolio turnover rate of the Underlying Funds in which the Portfolio invests.

SECURITIES LOANS

The Portfolio and the Underlying Funds are authorized to lend securities to qualified brokers, dealers, banks and other financial institutions for the purpose of earning additional income. While the Portfolio or an Underlying Fund may earn additional income from lending securities, such activity is incidental to the investment objective of the Portfolio or Underlying Fund. The value of securities loaned may not exceed 33 1/3% of the value of the Portfolio or Underlying Fund’s total assets, which includes the value of collateral received. To the extent the Portfolio or Underlying Fund loans a portion of its securities, the Portfolio or Underlying Fund will receive collateral consisting generally of cash or U.S. government securities, which will be maintained by marking to market daily in an amount equal to at least (i) 100% of the current market value of the loaned securities with respect to securities of the U.S. government or its agencies, (ii) 102% of the current market value of the loaned securities with respect to U.S. securities, and (iii) 105% of the current market value of the loaned securities with respect to foreign securities. Subject to its stated investment policies, the Portfolio or Underlying Fund will generally invest the cash collateral received for the loaned securities in The DFA Short Term Investment Fund (the “Money Market Series”), an affiliated registered money market fund advised by the Advisor for which the Advisor receives a management fee of 0.05% of the average daily net assets of the Money Market Series. The Underlying Funds may also invest such collateral in securities of the U.S. government or its agencies, repurchase agreements collateralized by securities of the U.S. government or its agencies, and unaffiliated registered and unregistered money market funds. For purposes of this paragraph, agencies include both agency debentures and agency mortgage backed securities.

In addition, the Portfolio or Underlying Fund will be able to terminate the loan at any time and will receive reasonable interest on the loan, as well as amounts equal to any dividends, interest or other distributions on the loaned securities. However, dividend income received from loaned securities may not be eligible to be taxed at qualified dividend income rates. The Portfolio or Underlying Fund will be entitled to recall a loaned security in time to vote proxies or otherwise obtain rights to vote proxies of loaned securities if the Portfolio or Underlying Fund knows a material event will occur. In the event of the bankruptcy of the borrower, DFA Investment Dimensions Group, Inc. (the “Fund”), Dimensional Emerging Markets Value Fund or The DFA Investment Trust Company could experience delay in recovering the loaned securities or only recover cash or a security of equivalent value. See “**Principal Risks—Securities Lending**” for a discussion of the risks related to securities lending.

MANAGEMENT OF THE FUND

The Advisor serves as investment advisor to the World ex U.S Value Portfolio and each of the Underlying Funds. Pursuant to an Investment Advisory Agreement with the Portfolio and each Underlying Fund, the Advisor is responsible for the management of their respective assets. The Portfolio and Underlying Funds are managed using a team approach. The investment team includes the Investment Committee of the Advisor, portfolio managers and trading personnel.

The Investment Committee is composed primarily of certain officers and directors of the Advisor who are appointed annually. As of the date of this Prospectus, the Investment Committee has seven members. Investment strategies for the Portfolio and Underlying Funds are set by the Investment Committee, which meets on a regular basis and also as needed to consider investment issues. The Investment Committee also sets and reviews all investment related policies and procedures and approves any changes in regards to approved countries, security types and brokers.

In accordance with the team approach used to manage the portfolios, the portfolio managers and portfolio traders implement the policies and procedures established by the Investment Committee. The portfolio managers and portfolio traders also make daily

investment decisions regarding the portfolios including running buy and sell programs based on the parameters established by the Investment Committee. Stephen A. Clark, Karen E. Umland, Joseph H. Chi and Jed S. Fogdall each serve as a portfolio manager of the Portfolio and Underlying Funds and coordinate the efforts of all other portfolio managers with respect to the day to day management of the Portfolio and Underlying Funds.

Mr. Clark is a Senior Portfolio Manager and Vice President of the Advisor and chairman of the Investment Committee. Mr. Clark received his MBA from the University of Chicago and his BS from Bradley University. Mr. Clark joined the Advisor as a Portfolio Manager in 2001 and has been responsible for the portfolio management group since January 2006.

Ms. Umland is a Senior Portfolio Manager and Vice President of the Advisor and a member of the Investment Committee. She received her BA from Yale University in 1988 and her MBA from the University of California at Los Angeles in 1993. Ms. Umland joined the Advisor in 1993 and has been a Portfolio Manager and responsible for the international equity portfolios since 1998.

Mr. Chi is a Portfolio Manager and Vice President of the Advisor. Mr. Chi has an MBA and BS from the University of California, Los Angeles and also a JD from the University of Southern California. Mr. Chi joined the Advisor as a Portfolio Manager in 2005 and has been responsible for the international equity portfolios since 2010.

Mr. Fogdall is a Portfolio Manager and Vice President of the Advisor. Mr. Fogdall has an MBA from the University of California, Los Angeles and a BS from Purdue University. Mr. Fogdall joined the Advisor as a Portfolio Manager in 2004 and has been responsible for the international equity portfolios since 2010.

The Portfolio's Statement of Additional Information ("SAI") provides information about each portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of Fund shares.

The Advisor provides the Portfolio and Underlying Funds with a trading department and selects brokers and dealers to effect securities transactions. Securities transactions are placed with a view to obtaining best price and execution. The Advisor's address is 6300 Bee Cave Road, Building One, Austin, TX 78746. A discussion regarding the basis for the Board of Directors approving the investment management agreement with respect to the Portfolio will be available in future annual or semi-annual reports for the Portfolio.

The Fund bears all of its own costs and expenses, including: services of its independent registered public accounting firm, legal counsel, brokerage fees, commissions and transfer taxes in connection with the acquisition and disposition of portfolio securities, taxes, insurance premiums, costs incidental to meetings of its shareholders and directors or trustees, the cost of filing its registration statements under the federal securities laws and the cost of any filings required under state securities laws, reports to shareholders, and transfer and dividend disbursing agency, administrative services and custodian fees, except as provided in the Fee Waiver and Expense Assumption Agreements for certain portfolios of the Fund. Expenses allocable to a particular portfolio of the Fund are so allocated. The expenses of the Fund which are not allocable to a particular portfolio are to be borne by each portfolio of the Fund on the basis of its relative net assets.

The Advisor has been engaged in the business of providing investment management services since May 1981. The Advisor is currently organized as a Delaware limited partnership and is controlled and operated by its general partner, Dimensional Holdings Inc., a Delaware corporation. The Advisor controls Dimensional Fund Advisors Ltd. ("DFAL") and DFA Australia Limited ("DFA Australia"). As of June 30, 2010, assets under management for all Dimensional affiliated advisors totaled approximately \$161 billion.

Management Fees

The "**Annual Fund Operating Expenses**" table describes the anticipated fees to be incurred by the Portfolio for the services provided by the Advisor for the fiscal year ended October 31, 2010. The "Management Fee" listed in the table for the Portfolio provides the investment advisory fee that is payable by the Portfolio to the Advisor.

Investment Services—the World ex U.S. Value Portfolio, DFA International Value Series, DFA International Small Cap Value Portfolio, and Dimensional Emerging Markets Value Fund

Pursuant to Sub-Advisory Agreements with the Advisor, DFA Australia, Level 43 Gateway, 1 Macquarie Place, Sydney, New South Wales 2000, Australia, has the authority and responsibility to select brokers and dealers to execute securities transactions for the World ex U.S. Value Portfolio, DFA International Value Series, DFA International Small Cap Value Portfolio, and Dimensional Emerging Markets Value Fund. DFA Australia's duties include the maintenance of a trading desk for the Portfolio and each Underlying Fund and the determination of the best and most efficient means of executing securities transactions. On at least a

semi-annual basis, the Advisor reviews the holdings of the World ex U.S. Value Portfolio, DFA International Value Series, DFA International Small Cap Value Portfolio, and Dimensional Emerging Markets Value Fund and reviews the trading process and the execution of securities transactions. The Advisor is responsible for determining those securities which are eligible for purchase and sale by the Portfolio and Underlying Funds and may delegate this task, subject to its own review, to DFA Australia. DFA Australia maintains and furnishes to the Advisor information and reports on Japanese and Asia Pacific Rim small companies, including its recommendations of securities to be added to the securities that are eligible for purchase by the Portfolio and each Underlying Fund as well as making recommendations and elections on corporate actions.

Investment Services—the World ex U.S. Value Portfolio, DFA International Value Series, DFA International Small Cap Value Portfolio, and Dimensional Emerging Markets Value Fund

Pursuant to Sub-Advisory Agreements with the Advisor, DFAL, 7 Down Street, London, W1J7AJ, United Kingdom, a company that is organized under the laws of England, has the authority and responsibility to select brokers or dealers to execute securities transactions for the World ex U.S. Value Portfolio, DFA International Value Series, DFA International Small Cap Value Portfolio, and Dimensional Emerging Markets Value Fund. DFAL's duties include the maintenance of a trading desk for the Portfolio and each Underlying Fund and the determination of the best and most efficient means of executing securities transactions. On at least a semi-annual basis, the Advisor reviews the holdings of the World ex U.S. Value Portfolio, DFA International Value Series, DFA International Small Cap Value Portfolio, and Dimensional Emerging Markets Value Fund and reviews the trading process and the execution of securities transactions. The Advisor is responsible for determining those securities which are eligible for purchase and sale by the Portfolio and Underlying Funds and may delegate this task, subject to its own review, to DFAL. DFAL maintains and furnishes to the Advisor information and reports on United Kingdom and European small companies, including its recommendations of securities to be added to the securities that are eligible for purchase by the Portfolio and Underlying Funds as well as making recommendations and elections on corporate actions. DFAL is a member of the Financial Services Authority ("FSA"), a self-regulatory organization for investment managers operating under the laws of England.

Fee Waiver Agreement

Pursuant to a Fee Waiver Agreement for the Portfolio, the Advisor has agreed to waive up to the full amount of the Portfolio's management fee of 0.47% to the extent necessary to offset the proportionate share of the management fees paid by the Portfolio through its investment in other funds managed by the Advisor (the "Underlying Funds").

In addition, under the Fee Waiver Agreement, the Advisor also has agreed to waive all or a portion of the management fee that remains payable by the Portfolio (i.e. the management fee remaining after the proportionate share of the Underlying Funds' management fees have been offset (the "Remaining Management Fee")) to the extent necessary to reduce the Portfolio's ordinary operating expenses (including expenses incurred through its investment in other investment companies) ("Portfolio Expenses") so that such Portfolio Expenses do not exceed 0.60% of the Portfolio's average net assets on an annualized basis (the "Expense Limitation Amount"). The maximum amount that may be waived to limit Portfolio Expenses pursuant to this paragraph is the amount of the Remaining Management Fee. Further, at any time that the Portfolio Expenses of the Portfolio are less than the Portfolio's Expense Limitation Amount, the Advisor retains the right to seek reimbursement for the amount of any Remaining Management Fees previously waived to the extent that such reimbursement will not cause the Portfolio's annualized Portfolio Expenses to exceed the Portfolio's Expense Limitation Amount. The Portfolio is not obligated to reimburse the Advisor for fees previously waived by the Advisor more than thirty-six months before the date of such reimbursement. The Fee Waiver Agreement for the Portfolio will remain in effect through March 1, 2011, and may not be terminated by the Advisor prior to that date.

DIVIDENDS, CAPITAL GAINS DISTRIBUTIONS AND TAXES

Dividends and Distributions. The World ex U.S. Value Portfolio intends to qualify each year as a regulated investment company under the Internal Revenue Code. As a regulated investment company, the Portfolio generally pays no federal income tax on the income and gains it distributes to you. Dividends from net investment income of the Portfolio are distributed quarterly (on a calendar basis) and any net realized capital gains (after any reductions for capital loss carryforwards) are distributed annually, typically in December. The Portfolio may also make an additional dividend distribution from net investment income in October of each year. The Portfolio may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Portfolio.

Capital gains distributions may vary considerably from year to year as a result of the Portfolio's normal investment activities and cash flows. During a time of economic downturn, the Portfolio may experience capital losses and unrealized depreciation in value of investments, the effect of which may be to reduce or eliminate capital gains distributions for a period of time. Even though the Portfolio may experience a current year loss, it may nonetheless distribute prior year capital gains.

You will automatically receive all income dividends and capital gains distributions in additional shares of the Portfolio at net asset value (as of the business date following the dividend record date), unless, upon written notice to the Advisor and completion of account information, you select one of the options listed below:

Income Option—to receive income dividends in cash and capital gains distributions in additional shares at net asset value.

Capital Gains Option—to receive capital gains distributions in cash and income dividends in additional shares at net asset value.

Cash Option—to receive both income dividends and capital gains distributions in cash.

Annual Statements. Every January, you will receive a statement that shows the tax status of distributions you received the previous calendar year. Distributions declared in December to shareholders of record in such month, but paid in January, are taxable as if they were paid in December.

Avoid “Buying A Dividend.” At the time you purchase your Portfolio shares, the Portfolio’s net asset value may reflect undistributed income, undistributed capital gains, or net unrealized appreciation in value of portfolio securities held by the Portfolio. A subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. This is sometimes referred to as “buying a dividend.”

Tax Considerations. This discussion of “**Tax Considerations**” should be read in conjunction with the remaining subsections below containing additional information. Also, unless otherwise indicated, the discussion below with respect to the Portfolio includes its pro rata share of the income of its Underlying Funds. In general, if you are a taxable investor, Portfolio distributions are taxable to you as ordinary income, capital gains, or some combination of both. This is true whether you reinvest your distributions in additional Portfolio shares or receive them in cash.

For federal income tax purposes, Portfolio distributions of short-term capital gains are taxable to you as ordinary income. Portfolio distributions of long-term capital gains are taxable to you as long-term capital gains no matter how long you have owned your shares. A portfolio with a high portfolio turnover rate (a measure of how frequently assets within a portfolio are bought and sold) is more likely to generate short-term capital gains than a portfolio with a low portfolio turnover rate. With respect to taxable years of the Portfolio beginning before January 1, 2011, unless such provision is extended or made permanent, a portion of income dividends designated by the Portfolio may be qualified dividend income eligible for taxation by individual shareholders at long-term capital gain rates provided certain holding period requirements are met.

The Portfolio may be subject to foreign withholding taxes on income from foreign securities. If at the end of its fiscal year more than 50% in value of the total assets of the Portfolio, including those attributable to the Portfolio from the Underlying Funds classified as partnerships, are invested in securities of foreign corporations, the Portfolio may elect to pass through to its shareholders their pro rata share of foreign income taxes treated as paid by the Portfolio. If this election is made, shareholders will be required to include in their gross income their pro rata share of these foreign taxes paid by the Portfolio and will be entitled either to deduct (as an itemized deduction in the case of individuals) their share of such foreign taxes in computing their taxable income or to claim a credit for such taxes against their U.S. federal income tax, subject to certain limitations under the Code.

The sale of shares of the Portfolio is a taxable event and may result in a capital gain or loss to you. Capital gain or loss may be realized from an ordinary redemption of shares or an exchange of shares between two portfolios. Any loss incurred on the sale or exchange of the Portfolio’s shares, held for six months or less, will be treated as a long-term capital loss to the extent of capital gain dividends received with respect to such shares.

By law, the Portfolio is required to withhold 28% of taxable dividends, capital gains distributions, and redemption proceeds paid to you if you do not provide your proper taxpayer identification number and certain required certifications. You may avoid this withholding requirement by providing and certifying on the account registration form your correct Taxpayer Identification Number and by certifying that you are not subject to backup withholding and are a U.S. person (including a U.S. resident alien). The Portfolio must also withhold if the IRS instructs it to do so.

In addition to federal taxes, you may be subject to state and local taxes on distributions from the Portfolio and on gains arising on redemption or exchange of the Portfolio’s shares. Distributions of interest income and capital gains realized from certain types of U.S. government securities may be exempt from state personal income taxes.

Non-U.S. Investors. Non-U.S. investors may be subject to U.S. withholding tax at a 30% or lower treaty rate and are subject to special U.S. tax certification requirements to avoid backup withholding and claim any treaty benefits. Exemptions from U.S. withholding tax are provided for capital gain dividends paid by the Portfolio from long-term capital gains, if any, and, with respect to

taxable years of the Portfolio that begin before January 1, 2010 (unless such sunset date is extended, possibly retroactively to January 1, 2010, or made permanent), interest-related dividends paid by the Portfolio from its qualified net interest income from U.S. sources and short-term capital gain dividends. However, notwithstanding such exemptions from U.S. withholding at the source, any such dividends and distributions of income and capital gains will be subject to backup withholding at a rate of 28% if you fail to properly certify that you are not a U.S. person. Non-U.S. investors also may be subject to U.S. estate tax.

This discussion of “DIVIDENDS, CAPITAL GAINS DISTRIBUTIONS AND TAXES” is not intended or written to be used as tax advice. Because everyone’s tax situation is unique, you should consult your tax professional about federal, state, local or foreign tax consequences before making an investment in the Portfolio. Prospective investors should also consult the statement of additional information.

PURCHASE OF SHARES

Cash Purchases

Investors may purchase shares of the Portfolio by first contacting the Advisor at (888) 576-1167 or (512) 306-7400 to notify the Advisor of the proposed investment. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions, and a limited number of certain other investors as approved from time to time by the Advisor (“Eligible Investors”). Eligible Investors include employees, former employees, shareholders and directors of the Advisor and the Fund and friends and family members of such persons. All investments are subject to approval of the Advisor, and all investors must complete and submit the necessary account registration forms in good order. The Fund reserves the right to reject any initial or additional investment and to suspend the offering of shares of the Portfolio.

“Good order” with respect to the purchase of shares means that (1) a fully completed and properly signed Account Registration Form and any additional supporting legal documentation required by the Advisor have been received in legible form, and (2) the Advisor has been notified of the purchase by telephone and, if the Advisor so requests, also in writing, no later than the close of regular trading on the New York Stock Exchange (“NYSE”) (normally, 1:00 p.m. PST) on the day of the purchase. If an order to purchase shares must be canceled due to nonpayment, the purchaser will be responsible for any loss incurred by the Fund arising out of such cancellation. To recover any such loss, the Fund reserves the right to redeem shares owned by any purchaser whose order is canceled, and such purchaser may be prohibited or restricted in the manner of placing further orders.

Investors having an account with a bank that is a member or a correspondent of a member of the Federal Reserve System may purchase shares by first calling the Advisor at (888) 576-1167 or (512) 306-7400 to notify the Advisor of the proposed investment, then requesting the bank to transmit immediately available funds (federal funds) by wire to PNC Bank, N.A. for the account of DFA Investment Dimensions Group Inc. (World ex U.S. Value Portfolio). Additional investments also may be made through the wire procedure by first notifying the Advisor. Investors who wish to purchase shares of the Portfolio by check should send their check to DFA Investment Dimensions Group Inc. (World ex U.S. Value Portfolio), c/o BNY Mellon Investment Servicing (US) Inc., Attn: Mail Stop F4-F760-1A-J, 760 Moore Road, King of Prussia, PA 19406.

Payment of the total amount due should be made in U.S. dollars. However, subject to approval by the Advisor, payment may be made in any freely convertible currency and the necessary foreign exchange transactions will be arranged on behalf of, and at the expense of, the applicant. Applicants settling in any currency other than U.S. dollars are advised that a delay in processing a purchase or redemption may occur to allow for currency conversion.

Shares also may be purchased and sold by individuals through securities firms that may charge a service fee or commission for such transactions. No such fee or commission is charged on shares that are purchased or redeemed directly from the Fund. Investors who are clients of investment advisory organizations may also be subject to investment advisory fees under their own arrangements with such organizations.

In-Kind Purchases

If accepted by the Fund, shares of the Portfolio may be purchased in exchange for securities which are eligible for acquisition by the Portfolio (or its corresponding Underlying Funds) or otherwise represented in their portfolios as described in this Prospectus or as otherwise consistent with the Fund’s policies or procedures or in exchange for local currencies in which such securities are denominated. Securities and local currencies accepted by the Fund for exchange and Fund shares to be issued in the exchange will be valued as set forth under “VALUATION OF SHARES” at the time of the next determination of net asset value after such acceptance. All dividends, interest, subscription, or other rights pertaining to such securities shall become the property of the Portfolio whose shares are being acquired and must be delivered to the Fund by the investor upon receipt from the issuer. Investors who desire to purchase shares of the Portfolio with local currencies should first contact the Advisor.

The Fund will not accept securities in exchange for shares of the Portfolio unless: (1) such securities are, at the time of the exchange, eligible to be included, or otherwise represented, in the Portfolio whose shares are to be issued (or in its corresponding Underlying Funds) and current market quotations are readily available for such securities; (2) the investor represents and agrees that all securities offered to be exchanged are not subject to any restrictions upon their sale by the Portfolio under the Securities Act of 1933 or under the laws of the country in which the principal market for such securities exists, or otherwise; and (3) at the discretion of the Fund, the value of any such security (except U.S. government securities) being exchanged, together with other securities of the same issuer owned by the Portfolio or an Underlying Fund, may not exceed 5% of the net assets of the Portfolio or Underlying Fund immediately after the transaction.

A gain or loss for federal income tax purposes will generally be realized by investors who are subject to federal taxation upon the exchange depending upon the cost of the securities or local currency exchanged. Investors interested in such exchanges should contact the Advisor. Purchases of shares will be made in full and fractional shares calculated to three decimal places. In the interest of economy and convenience, certificates for shares will not be issued.

POLICY REGARDING EXCESSIVE OR SHORT-TERM TRADING

The Portfolio is designed for long-term investors and is not intended for investors that engage in excessive short-term trading activity that may be harmful to the Portfolio, including but not limited to market timing. Short-term or excessive trading into and out of the Portfolio can disrupt portfolio management strategies, harm performance and increase Portfolio expenses for all shareholders, including long-term shareholders who do not generate these costs.

In addition, the nature of the holdings of the Portfolio may present opportunities for a shareholder to engage in a short-term trading strategy that exploits possible delays between changes in the price of the Portfolio's holdings and the reflection of those changes in the Portfolio's net asset value (called "arbitrage market timing"). Such delays may occur because the Portfolio has significant investments in foreign securities where, due to time zone differences, the values of those securities are established some time before the Portfolio calculates its net asset value. In such circumstances, the available market prices for such foreign securities may not accurately reflect the latest indications of value at the time the Portfolio calculates its net asset value. There is a possibility that arbitrage market timing may dilute the value of the Portfolio's shares if redeeming shareholders receive proceeds (and purchasing shareholders receive shares) based upon a net asset value that does not reflect appropriate fair value prices.

The Board of Directors of the Fund (the "Board") has adopted a policy (the "Trading Policy") and the Advisor and DFA Securities LLC (collectively, "Dimensional") and Dimensional's agents have implemented the following procedures, which are designed to discourage and prevent market timing or excessive short-term trading in the Fund: (i) trade activity monitoring and purchase blocking procedures; and (ii) use of fair value pricing.

The Fund, Dimensional and their agents monitor trades and flows of money in and out of the Portfolio from time to time in an effort to detect excessive short-term trading activities, and for consistent enforcement of the Trading Policy. The Fund reserves the right to take the actions necessary to stop excessive or disruptive trading activities, including refusing or canceling purchase or exchange orders for any reason, without prior notice, particularly purchase or exchange orders that the Fund believes are made on behalf of market timers. The Fund, Dimensional and their agents reserve the right to restrict, refuse or cancel any purchase or exchange request made by an investor indefinitely if the Fund or Dimensional believe that any combination of trading activity in the accounts is potentially disruptive to the Portfolio. In making such judgments, the Fund and Dimensional seek to act in a manner that is consistent with the interests of shareholders. For purposes of applying these procedures, Dimensional may consider an investor's trading history in the Portfolio, and accounts under common ownership, influence or control.

In addition to the Fund's general ability to restrict potentially disruptive trading activity as described above, the Fund also has adopted purchase blocking procedures. Under the Fund's purchase blocking procedures, where an investor has engaged in any two purchases and two redemptions (including redemptions that are part of an exchange transaction) in the Portfolio in any rolling 30 calendar day monitoring period (i.e., two "round trips"), the Fund and Dimensional intend to block the investor from making any additional purchases in the Portfolio for 90 calendar days (a "purchase block"). If implemented, a purchase block will begin at some point after the transaction that caused the investor to have engaged in the prohibited two round-trips is detected by the Fund, Dimensional, or their agents. The Fund and Dimensional are permitted to implement a longer purchase block, or permanently bar future purchases by an investor, if they determine that it is appropriate.

Under the Fund's purchase blocking procedures, the following purchases and redemptions will not trigger a purchase block: (i) purchases and redemptions of shares having a value in each transaction of less than \$5,000; (ii) purchases and redemptions by U.S. registered investment companies that operate as fund of funds and non-U.S. investment companies that operate as fund of funds that the Fund or Dimensional, in their sole discretion, have determined are not designed and/or are not serving as vehicles for excessive

short-term or other disruptive trading (in each case, the fund of funds shall agree to be subject to monitoring by Dimensional); (iii) purchases and redemptions by a feeder portfolio of a master fund's shares; (iv) systematic or automated transactions where the shareholder, financial advisor or investment fiduciary does not exercise direct control over the investment decision; (v) retirement plan contributions, loans, loan repayments and distributions (including hardship withdrawals) identified as such in the retirement plan recordkeeper's system; (vi) purchase transactions involving transfers of assets, rollovers, Roth IRA conversions and IRA recharacterizations; (vii) purchases of shares with Portfolio dividends or capital gain distributions; (viii) transfers and reregistrations of shares within the same Portfolio; and (ix) transactions by 529 Plans. Notwithstanding the Fund's purchase blocking procedures, all transactions in Portfolio shares are subject to the right of the Fund and Dimensional to restrict potentially disruptive trading activity (including purchases and redemptions described above that will not be subject to the purchase blocking procedures).

The Fund, Dimensional or their designees will have the ability, pursuant to Rule 22c-2 under the Investment Company Act of 1940 (the "1940 Act"), to request information from financial intermediaries, such as 401(k) plan administrators, trust companies and broker dealers (together, "Intermediaries"), concerning trades placed in omnibus and other multi-investor accounts (together, "Omnibus Accounts"), in order to attempt to monitor trades that are placed by the underlying shareholders of these Omnibus Accounts. The Fund, Dimensional and their designees will use the information obtained from the Intermediaries to monitor trading in the Fund and to attempt to identify shareholders in Omnibus Accounts engaged in trading that is inconsistent with the Trading Policy or otherwise not in the best interests of the Fund. The Fund, Dimensional or their designees, when they detect trading patterns in shares of the Fund that may constitute short-term or excessive trading, will provide written instructions to the Intermediary to restrict or prohibit further purchases or exchanges of shares of the Portfolio by a shareholder that has been identified as having engaged in excessive or short-term transactions in the Portfolio's shares (directly or indirectly through the Intermediary's account) that violate the Trading Policy.

The ability of the Fund and Dimensional to impose these limitations, including the purchase blocking procedures, on investors investing through Intermediaries is dependent on the receipt of information necessary to identify transactions by the underlying investors and the Intermediary's cooperation in implementing the Trading Policy. Investors seeking to engage in excessive short-term trading practices may deploy a variety of strategies to avoid detection, and despite the efforts of the Fund and Dimensional to prevent excessive short-term trading, there is no assurance that the Fund, Dimensional or their agents will be able to identify those shareholders or curtail their trading practices. The ability of the Fund, Dimensional and their agents to detect and limit excessive short-term trading also may be restricted by operational systems and technological limitations.

The purchase blocking procedures of the Trading Policy may not apply to redemptions by shareholders whose shares are held on the books of Intermediaries if the Intermediaries have not adopted procedures to implement this Policy. The Fund and Dimensional will work with Intermediaries to develop such policies to institute the purchase blocking procedures or other procedures that the Fund and Dimensional determine are reasonably designed to achieve the objective of this Trading Policy. At the time the Intermediaries adopt these procedures, shareholders whose accounts are on the books of such Intermediaries will be subject to the Trading Policy's purchase blocking procedures or another frequent trading policy that achieves the objective of the purchase blocking procedures. Investors that invest in the Portfolio through an Intermediary should contact the Intermediary for information concerning the policies and procedures that apply to the investor.

As of the date of this Prospectus, the ability of the Fund and Dimensional to apply the purchase blocking procedures on purchases by all investors and the ability of the Fund and Dimensional to monitor trades through Omnibus Accounts maintained by Intermediaries may be restricted due to systems limitations of the Fund's service providers and the Intermediaries. The Fund expects that the application of the Trading Policy as described above, including the purchase blocking procedures (subject to the limitations described above), will be able to be implemented by Intermediaries in compliance with Rule 22c-2 under the 1940 Act.

In addition, the purchase blocking procedures will not apply to a redemption transaction in which the Portfolio distributes portfolio securities to a shareholder in-kind, where the redemption will not disrupt the efficient portfolio management of the Portfolio/Underlying Fund and the redemption is consistent with the interests of the remaining shareholders of the Portfolio/Underlying Fund.

In addition to monitoring trade activity, the Board has adopted fair value pricing procedures that govern the pricing of the securities of the Portfolio and Underlying Funds. These procedures are designed to help ensure that the prices at which Portfolio shares are purchased and redeemed are fair, and do not result in dilution of shareholder interests or other harm to shareholders. See the discussion under "**VALUATION OF SHARES—Net Asset Value**" for additional details regarding fair value pricing of the Portfolio's securities.

Although the procedures are designed to discourage excessive short-term trading, none of the procedures individually nor all of the procedures taken together can completely eliminate the possibility that excessive short-term trading activity in the Portfolio may

occur. The Portfolio and Underlying Funds do not knowingly accommodate excessive or disruptive trading activities, including market timing.

VALUATION OF SHARES

Net Asset Value

The net asset value per share of the Portfolio and the net asset value per share of each Underlying Fund is calculated after the close of the NYSE (normally, 1:00 p.m. PT) by dividing the total value of the investments and other assets of the Portfolio or an Underlying Fund less any liabilities, by the total outstanding shares of the stock of the respective Portfolio or Underlying Fund. *Note:* The time at which transactions and shares are priced may be changed in case of an emergency or if the NYSE closes at a time other than 1:00 p.m. PT.

The value of the shares of the Portfolio will fluctuate in relation to its own investment experience and the investment experience of the Underlying Funds in which the Portfolio invests. Securities held by the Portfolio and Underlying Funds will be valued in accordance with applicable laws and procedures adopted by the Board of Directors or Trustees, and generally, as described below.

Securities held by the Portfolio and Underlying Funds (including over-the-counter securities) are valued at the last quoted sale price of the day. Securities held by the Portfolio and Underlying Funds that are listed on Nasdaq are valued at the Nasdaq Official Closing Price (“NOCP”). If there is no last reported sale price or NOCP of the day, the Portfolio and Underlying Funds value the securities at the mean of the most recent quoted bid and asked prices. Price information on listed securities is taken from the exchange where the security is primarily traded. Generally, securities issued by open-end investment companies, such as the Underlying Funds, are valued using their respective net asset values or public offering prices, as appropriate, for purchase orders placed at the close of the NYSE.

Debt securities will be valued on the basis of prices provided by one or more pricing services or other reasonably reliable sources including broker/dealers that typically handle the purchase and sale of such securities. Securities which are traded over-the-counter and on a stock exchange generally will be valued according to the broadest and most representative market, and it is expected that for bonds and other fixed income securities, this ordinarily will be the over-the-counter market.

The value of the securities and other assets of the Portfolio and Underlying Funds for which no market quotations are readily available (including restricted securities), or for which market quotations have become unreliable, are determined in good faith at fair value in accordance with procedures adopted by the Board of Directors or Trustees, as the case may be. Fair value pricing may also be used if events that have a significant effect on the value of an investment (as determined in the discretion of the Investment Committee of the Advisor) occur before the net asset value is calculated. When fair value pricing is used, the prices of securities used by the Portfolio and Underlying Funds may differ from the quoted or published prices for the same securities on their primary markets or exchanges.

To the extent that the Portfolio or an Underlying Fund holds large numbers of securities, it is likely that it will have a larger number of securities that may be deemed illiquid and therefore must be valued pursuant to special procedures adopted by the Board of Directors or Trustees, than would a fund that holds a smaller number of securities. Portfolios that invest in small capitalization companies are more likely to hold illiquid securities than would a fund that invests in larger capitalization companies.

As of the date of this Prospectus, the Portfolio and Underlying Funds holding foreign equity securities (the “Foreign Equity Funds”) will also fair value price in the circumstances described below. Generally, trading in foreign securities markets is completed each day at various times before the close of the NYSE. For example, trading in the Japanese securities markets is completed each day at the close of the Tokyo Stock Exchange (normally, 11:00 p.m. PT), which is fourteen hours before the close of the NYSE (normally, 1:00 p.m. PT) and the time that the net asset values of the Foreign Equity Funds are computed. Due to the time differences between the closings of the relevant foreign securities exchanges and the time the Foreign Equity Funds price their shares at the close of the NYSE, the Foreign Equity Funds will fair value their foreign investments when it is determined that the market quotations for the foreign investments are either unreliable or not readily available. The fair value prices will attempt to reflect the impact of the U.S. financial markets’ perceptions and trading activities on the Foreign Equity Funds’ foreign investments since the last closing prices of the foreign investments were calculated on their primary foreign securities markets or exchanges. For these purposes, the Boards of Directors/Trustees of the Foreign Equity Funds have determined that movements in relevant indices or other appropriate market indicators, after the close of the Tokyo Stock Exchange or the London Stock Exchange, demonstrate that market quotations may be unreliable, and may trigger fair value pricing. Consequently, fair valuation of portfolio securities may occur on a daily basis. The fair value pricing by the Foreign Equity Funds utilizes data furnished by an independent pricing service (and that data draws upon, among other information, the market values of foreign investments). When a Foreign Equity Fund uses fair value pricing, the values assigned

to the Foreign Equity Fund's foreign investments may not be the quoted or published prices of the investments on their primary markets or exchanges. The Boards of Directors/Trustees of the Foreign Equity Funds monitor the operation of the method used to fair value price the Foreign Equity Funds' foreign investments.

Valuing securities at fair value involves greater reliance on judgment than valuing securities that have readily available market quotations. There can be no assurance that the Portfolio or an Underlying Fund could obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Portfolio or Underlying Fund determines its net asset value per share. As a result, the sale or redemption by the Portfolio or an Underlying Fund of its shares at net asset value, at a time when a holding or holdings are valued at fair value, may have the effect of diluting or increasing the economic interest of existing shareholders.

The net asset value per share of the Portfolio is expressed in U.S. dollars by translating the net assets of the Portfolio and Underlying Funds using the mean of the most recent bid and asked prices for the dollar as quoted by generally recognized reliable sources. Because the Portfolio and Underlying Funds own securities that are primarily listed on foreign exchanges which may trade on days when the Portfolio and Underlying Funds do not price their shares, the net asset values of the Portfolio and such Underlying Funds may change on days when shareholders will not be able to purchase or redeem shares.

The Portfolio and Underlying Funds generally calculate their net asset values per share and accept purchase and redemption orders on days that the NYSE is open for trading.

Certain of the securities holdings of the Portfolio in Approved Markets may be subject to tax, investment and currency repatriation regulations of the Approved Markets that could have a material effect on the values of the securities. For example, such funds might be subject to different levels of taxation on current income and realized gains depending upon the holding period of the securities. In general, a longer holding period (e.g., 5 years) may result in the imposition of lower tax rates than a shorter holding period (e.g., 1 year). The Portfolio may also be subject to certain contractual arrangements with investment authorities in an Approved Market which require the Portfolio to maintain minimum holding periods or to limit the extent of repatriation of income and realized gains.

Futures contracts are valued using the settlement price established each day on the exchange on which they are traded. The value of such futures contracts held by the Portfolio or an Underlying Fund is determined each day as of such close.

Public Offering Price

Provided that the transfer agent has received the investor's Account Registration Form in good order and the custodian has received the investor's payment, shares of the Portfolio selected will be priced at the public offering price, which is the net asset value of the shares next determined after receipt of the investor's funds by the custodian. The transfer agent or the Fund may, from time to time, appoint sub-transfer agents or various financial intermediaries ("Intermediaries") for the receipt of purchase orders, redemption orders and funds from certain investors. Intermediaries, in turn, are authorized to designate other financial intermediaries ("Subdesignees") to receive purchase and redemption orders for the Portfolio's shares from investors. With respect to such investors, the shares of the Portfolio selected will be priced at the public offering price calculated after receipt of the purchase order by the Intermediary or Sub-designee, as applicable, that is authorized to receive purchase orders. If the investor buys shares through an Intermediary or a Sub-designee, the purchase price will be the public offering price next calculated after the Intermediary or Subdesignee, as applicable, receives the order, rather than on the day the custodian receives the investor's payment (provided that the Intermediary or Sub-designee, as applicable, has received the investor's purchase order in good order, and the investor has complied with the Intermediary's or Sub-designee's payment procedures). No reimbursement fee or sales charge is imposed on purchases. If an order to purchase shares must be canceled due to non-payment, the purchaser will be responsible for any loss incurred by the Portfolio arising out of such cancellation. The Fund reserves the right to redeem shares owned by any purchaser whose order is canceled to recover any resulting loss to the Portfolio and may prohibit or restrict the manner in which such purchaser may place further orders.

EXCHANGE OF SHARES

Investors may exchange shares of the Portfolio for shares of another portfolio in the Fund or a portfolio of Dimensional Investment Group Inc., an open-end investment management company. Investors should first contact the Advisor at (888) 576-1167 or (512) 306-7400 to notify the Advisor of the proposed exchange, and then send a letter of instruction to: DFA Investment Dimensions Group Inc. A letter of instruction for an exchange of shares may be sent by mail to the following: Attn: Client Operations, 6300 Bee Cave Road, Building One, Austin, TX 78746. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary for information regarding exchanges.

The minimum amount for an exchange is \$100,000. Exchanges are accepted into those portfolios that are eligible for the exchange privilege. Investors may contact the Advisor at the above-listed phone number for more information on such exchanges, for a list of those portfolios that accept exchanges, and to request a copy of the prospectuses of other portfolios of the Fund or Dimensional Investment Group Inc. There is no fee imposed on an exchange. However, the Fund reserves the right to impose an administrative fee in order to cover the costs incurred in processing an exchange. Any such fee will be disclosed in the Prospectus. An exchange is treated as a redemption and a purchase. Therefore, an investor could realize a taxable gain or a loss on the transaction. The Fund reserves the right to revise or terminate the exchange privilege, waive the minimum amount requirement, limit the amount of or reject any exchange, as deemed necessary, at any time.

The exchange privilege is not intended to afford shareholders a way to speculate on short-term movements in the markets. Accordingly, in order to prevent excessive use of the exchange privilege that may potentially disrupt the management of the Portfolio or otherwise adversely affect the Fund, any proposed exchange will be subject to the approval of the Advisor. Such approval will depend on: (i) the size of the proposed exchange; (ii) the prior number of exchanges by that shareholder; (iii) the nature of the underlying securities and the cash position of the Portfolio involved in the proposed exchange; (iv) the transaction costs involved in processing the exchange; and (v) the total number of redemptions by exchange already made out of the Portfolio. Excessive use of the exchange privilege is defined as any pattern of exchanges among portfolios by an investor that evidences market timing.

The redemption and purchase prices of shares redeemed and purchased by exchange, respectively, are the net asset values next determined after the Advisor has received a letter of instruction in good order. "Good order" means a completed letter of instruction specifying the dollar amount to be exchanged, signed by all registered owners (or representatives thereof) of the shares; and if the Fund does not have on file the authorized signatures for the account, proof of authority. Exchanges will be accepted only if stock certificates have not been issued and the shares of the Portfolio being acquired are registered in the investor's state of residence.

REDEMPTION OF SHARES

Redemption Procedure

Investors who desire to redeem shares of the Portfolio must first contact the Advisor at (888) 576-1167 or (512) 306-7400. Shareholders who invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding redemption procedures. The Portfolio will redeem shares at the net asset value of such shares next determined, either: (1) where stock certificates have not been issued, after receipt of a written request for redemption in good order, by the transfer agent (or by an Intermediary or a Sub-designee, if applicable), or (2) if stock certificates have been issued, after receipt of the stock certificates in good order at the office of the transfer agent. "Good order" means that the request to redeem shares must include all necessary documentation, to be received in writing by the Advisor no later than the close of regular trading on the NYSE (normally, 1:00 p.m. PT), including but not limited to: the stock certificate(s), if issued; a letter of instruction or a stock assignment specifying the number of shares or dollar amount to be redeemed, signed by all registered owners (or representatives thereof) of the shares; and, if the Fund does not have on file the authorized signatures for the account, proof of authority.

Shareholders redeeming shares for which certificates have not been issued, who have authorized redemption payment by wire in writing, may request that redemption proceeds be paid in federal funds wired to the bank they have designated in writing. The Fund reserves the right to send redemption proceeds by check in its discretion; a shareholder may request overnight delivery of such check at the shareholder's own expense. If the proceeds are wired to the shareholder's account at a bank which is not a member of the Federal Reserve System, there could be a delay in crediting the funds to the shareholder's bank account. The Fund reserves the right at any time to suspend or terminate the redemption by wire procedure after prior notification to shareholders. No fee is charged for redemptions. The redemption of all shares in an account will result in the account being closed. A new Account Registration Form will be required for future investments. See "**PURCHASE OF SHARES.**" In the interests of economy and convenience, certificates for shares are not issued.

Although the redemption payments will ordinarily be made within seven days after receipt, payment to investors redeeming shares which were purchased by check will not be made until the Fund can verify that the payments for the purchase have been, or will be, collected, which may take up to ten days or more. Investors may avoid this delay by submitting a certified check along with the purchase order.

Redemption of Small Accounts

The Fund reserves the right to redeem an account if the value of the shares in the Portfolio is \$500 or less because of redemptions. Before the Fund involuntarily redeems shares from such an account and sends the proceeds to the stockholder, the Fund will give written notice of the redemption to the stockholder at least sixty days before the redemption date. The stockholder will then have sixty days from the date of the notice to make an additional investment in order to bring the value of the shares in the account for

the Portfolio to more than \$500 and avoid such involuntary redemption. The redemption price to be paid to a stockholder for shares redeemed by the Fund under this right will be the aggregate net asset value of the shares in the account at the close of business on the redemption date. The right to redeem small accounts applies to accounts established with the Fund's transfer agent.

In-Kind Redemptions

When in the best interests of the Portfolio, the Portfolio may make a redemption payment, in whole or in part, by a distribution of portfolio securities that the Portfolio receives from the Underlying Funds in lieu of cash. Such distributions will be made in accordance with the federal securities laws and regulations governing mutual funds. Investors may incur brokerage charges and other transaction costs selling securities that were received in payment of redemptions. The Portfolio reserves the right to redeem its shares in the currencies in which its investments (and, the currencies in which the investments of the corresponding Underlying Funds) are denominated. Investors may incur charges in converting such securities to dollars and the value of the securities may be affected by currency exchange fluctuations.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Portfolio and Underlying Funds generally will disclose up to their 25 largest portfolio holdings (other than cash and cash equivalents) and the percentages that each of these largest portfolio holdings represent of the total assets of the Portfolio or an Underlying Fund, as of the most recent month-end, online at the Advisor's public website, <http://www.dimensional.com>, within 20 days after the end of each month. The Portfolio and Underlying Funds also generally will disclose their complete portfolio holdings (other than cash and cash equivalents), as of month-end, online at the Advisor's public website, two months following the month-end or more frequently and at different periods when authorized in accordance with the Portfolio and Underlying Funds' policies and procedures. Please consult the SAI for a description of the other policies and procedures that govern disclosure of the portfolio holdings by the Portfolio.

DELIVERY OF SHAREHOLDER DOCUMENTS

To eliminate duplicate mailings and reduce expenses, the Portfolio may deliver a single copy of certain shareholder documents, such as this Prospectus and annual and semi-annual reports, to related shareholders at the same address, even if accounts are registered in different names. This practice is known as "householding." The Portfolio will not household personal information documents, such as account statements. If you do not want the mailings of these documents to be combined with other members of your household, please call us collect at (512) 306-7400. We will begin sending individual copies of the shareholder documents to you within 30 days of receiving your request.
