Shareholders are advised to consult their own tax advisors with respect to the tax consequences of their investment in the Funds. Because tax laws vary among cities and states, you should consult your tax advisor about the specific rules in the state(s) in which you pay income taxes.

Funds which paid short-term capital gain distributions have 100% Qualified Short-Term Capital Gains.
- (2) Foreign Tax Credit is applicable for certain Funds. Please see enclosed information regarding the Foreign Tax Credit specific to your Fund.

Distributions of net investment income and short-term capital gains, whether paid to you in cash or reinvested in your account during 2011, are taxable as ordinary income for Federal income tax purposes. Distributions of long-term capital gains are taxable as such, whether paid to you in cash or reinvested in your account during 2011, regardless of the length of time shares were held by you.

Past distributions and performance are no guarantee of future distributions or results. If you are investing through an IRA or other tax-deferred account, special rules apply.

Foreign Tax Information

The information below summarizes the amount of income by fund that was derived from foreign sources. The foreign source income may have taxes associated with it that were paid to various foreign jurisdictions. Included on your Form 1099-DIV is your proportionate amount of these foreign taxes (Box #6). You may claim this amount either as an itemized deduction or as a foreign tax credit, subject to applicable limitations, on your federal tax return. We suggest that you consult a tax advisor to determine which method is more appropriate for you. To claim a foreign tax credit, you may need to file IRS Form 1116. To determine the amount of foreign source income for Form 1116, multiply the amount in Box 1a of your Form 1099-DIV by the 'Foreign Source Income Factor' in the table below. Foreign tax information by country can be obtained by request.
